Satellites And Commissars Strategy And Conflict In The Politics Of Soviet Bloc Trade:

Satellites and Commissars Randall W. Stone, 2002-04-21 This work explains how the Soviet Union made numerous attempts to reduce its implicit trade subsidy and increase the efficiency of the bloc *Who Adjusts?* Beth A. Simmons, 2020-03-31 In this work Beth Simmons presents a fresh view of why governments decided to abide by or defect from the gold standard during the 1920s and 1930s Previous studies of the spread of the Great Depression have emphasized tit for tat currency and tariff manipulation and a subsequent cycle of destructive competition Simmons on the other hand analyzes the influence of domestic politics on national responses to the international economy In so doing she powerfully confirms that different political regimes choose different economic adjustment strategies *Globalization Under and After Socialism* Besnik Pula, 2018-07-31 The post communist states of Central and Eastern Europe have gone from being among the world's most closed autarkic economies to being some of the most export oriented and globally integrated While previous accounts have attributed this shift to post 1989 market reform policies Besnik Pula sees the root causes differently Reaching deeper into the region's history and comparatively examining its long run industrial development he locates critical junctures that forced the hands of Central and Eastern European elites and made them look at options beyond the domestic economy and the socialist bloc In the 1970s Central and Eastern European socialist leaders intensified engagements with the capitalist West in order to expand access to markets technology and capital This shift began to challenge the Stalinist developmental model in favor of exports and transnational integration A new reliance on exports launched the integration of Eastern European industry into value chains that cut across the East West political divide After 1989 these chains proved to be critical gateways to foreign direct investment and circuits of global capitalism This book enriches our understanding of a regional shift that began well before the fall of the wall while also explaining the distinct international roles that Central and Eastern European states have assumed in the globalized twenty first century [Poland and European East-West Cooperation in the 1970s](#) Aleksandra Komornicka, 2023-09-20 This book offers an international reading of the Polish socialist regime's history in the 1970s and its opening up to the West It bridges Poland's socialist domestic history with critical developments of the global and European 1970s including détente in the Cold War western European integration and globalisation In this period of international transformations socialist Poland under Edward Gierek's leadership multiplied its economic and political contacts with capitalist countries especially western Europe and became a leader of East West cooperation among Council for Mutual Economic Assistance and Warsaw Pact members Relying on sources from public and corporate archives in five different European states the book demonstrates both that the global political and economic transformations of that period were critical for the decision making process in Poland and moreover that the national socialist elites participated in shaping these transformations By looking at the goals and expectations of the Polish socialist elites and their practices of political and economic exchanges with western Europe the book explains the logic which drove

the socialist regime into entanglement with the West As is shown here this entanglement proved inextricable and critical for the socialist regime's failure and Poland's political and economic future This book will be of much interest to students of European history cold war studies socialism studies and International Relations Energy Dependence and Supply Security Anatole Boute, 2023-10-08 Russia's 2022 invasion of Ukraine administered an unprecedented shock to the European and global energy markets triggering emergency interventions and market reforms to limit the impact of the crisis on energy prices and supply security More fundamentally the supply shock sparked a profound reappraisal of foreign supply and infrastructure dependencies for example on China leading states to adopt new legal initiatives to strengthen the resilience of their clean energy supply chains Energy geopolitics and supply security are now firmly back at the centre of global energy policy and in this new geopolitical reality we critically need to reassess the role of energy law in the creation and avoidance of dangerous energy dependencies Using the 2022 energy crisis as core example Energy Dependence and Supply Security offers a legal analysis of energy trade and investment as a tool of geopolitical power an issue seldom considered outside of economic statecraft and energy geopolitics Anatole Boute's timely analysis illustrates the paradox of energy law and security legal instruments of energy security have helped create the supply and infrastructure dependencies that allowed for the weaponization of energy The book examines the legal responses adopted by the European Union to the impact of the Russian energy shock reflecting on strategies to avoid similar disruptions in the clean energy industry In turn it proposes innovative supply security reforms that would allow dependencies to be managed while still preserving the international collaboration that is needed to accelerate the transition to clean affordable and secure energy systems *Reassessing Cold War Europe* Sari Autio-Saraso, Katalin Miklóssy, 2010-10-18 Presents a reassessment of Europe in the Cold War period 1945-91 This book shows that relations between East and West were based not only on confrontation and mutual distrust but also on collaboration It reveals that there is in fact considerable interaction and exchange between states enterprises associations organisations and individuals *Kooperation in Europa/Cooperation in Europe* Mihai Márton, Dorin Dobrea, Zolt K. Lengyel, 2014-12-18 Europa hat im 20. Jahrhundert eine Reihe unterschiedlicher Kooperationsmodelle erlebt Ausgehend von Richard Coudenhove Kalergis Vorstellung eines Pan Europa diskutieren die Beiträge dieses Bandes politische kulturelle und finanzielle Kooperationen auf europäischer Ebene Zeitliche Schwerpunkte bilden dabei die Zwischenkriegszeit die kommunistische Periode und die Phase nach dem Zusammenbruch der Sowjetunion die den betroffenen Staaten neue Chancen multilateraler und regionaler Zusammenarbeit eröffnete Die Autorinnen und Autoren sind an universitären und außeruniversitären Einrichtungen in Berlin Bochum Budapest Cluj Napoca und Regensburg beschäftigt Ihren deutsch bzw. englischsprachigen Aufsätzen sind Zusammenfassungen in der jeweils von Mihai Márton in anderer Sprache beigefügt *Red Globalization* Oscar Sanchez-Sibony, 2014-03-06 Was the Soviet Union a superpower *Red Globalization* is a significant rereading of the Cold War as an economic struggle shaped by the global economy Oscar Sanchez-Sibony challenges the idea

that the Soviet Union represented a parallel socio economic construct to the liberal world economy Instead he shows that the USSR a middle income country more often than not at the mercy of global economic forces tracked the same path as other countries in the world moving from 1930s autarky to the globalizing processes of the postwar period In examining the constraints and opportunities afforded the Soviets in their engagement of the capitalist world he questions the very foundations of the Cold War narrative as a contest between superpowers in a bipolar world Far from an economic force in the world the Soviets managed only to become dependent providers of energy to the rich world and second best partners to the global South

Disruption Michael De Groot,2024-03-15 In *Disruption* Michael De Groot argues that the global economic upheaval of the 1970s was decisive in ending the Cold War Both the West and the Soviet bloc struggled with the slowdown of economic growth chaos in the international monetary system inflation shocks in the commodities markets and the emergence of offshore financial markets The superpowers had previously disseminated resources to their allies to enhance their own national security but the disappearance of postwar conditions during the 1970s forced Washington and Moscow to choose between promoting their own economic interests and supporting their partners in Europe and Asia De Groot shows that new unexpected macroeconomic imbalances in global capitalism sustained the West during the following decade Rather than a creditor nation and net exporter as it had been during the postwar period the United States became a net importer of capital and goods during the 1980s that helped fund public spending stimulated economic activity and lubricated the private sector The United States could now live beyond its means and continue waging the Cold War and its allies benefited from access to the booming US market and the strengthened US military umbrella As *Disruption* demonstrates a new symbiotic economic architecture powered the West but the Eastern European regimes increasingly became a burden to the Soviet Union They were drowning in debt and the Kremlin no longer had the resources to rescue them

cooperation are also highlighted The book unpacks the subject's extensive scholarly discourse underlining the interdisciplinary character of today's Cold War historiography and the importance of understanding that its development has been informed by a vibrant interface between international history international relations and the Cold War itself

Competition in Socialist Society Katalin Miklóssy, Melanie Ilic, 2014-07-25 This book explores how the concept of competition which is usually associated with market economies operated under state socialism in the Soviet Union and Eastern Europe where the socialist system based on command economic planning and state centred control over society was supposed to emphasise co operation rather than competitive mechanisms The book considers competition in a wider range of industries and social fields across the Soviet bloc and shows how the gradual adoption and adaptation of Western practices led to the emergence of more open competitiveness in socialist society The book includes discussion of the state's view of competition and focuses especially on how competition operated at the grassroots level It covers politico economic reforms and their impact both overall and at the enterprise level competition in the cultural sphere and the huge effect of increasing competition on socialist ways of thinking

Re-Evaluating Regional Organizations Evgeny Vinokurov, Alexander Libman, 2017-05-22 This book re evaluates the regional organizations landscape and discusses how organizations with similar mandates can exercise strikingly different goals Even economic organizations which do not produce any outcomes in terms of economic cooperation can be valuable for their members or individual stakeholders The book's argument is supported by a combination of quantitative and qualitative methods It employs a novel dataset of 60 regional organizations to establish correlations between members goals and their characteristics More than a dozen case studies in Latin America Africa Middle East Southeast Asia and post Soviet Eurasia illustrate the theoretic arguments of how particular types of regional organizations come into existence and evolve Finally the book examines the remarkable resilience of regional organizations and considers the conditions under which the stakeholders are willing to abandon support

The Warsaw Pact

Reconsidered Laurien Crump, 2015-02-11 The Warsaw Pact is generally regarded as a mere instrument of Soviet power In the 1960s the alliance nevertheless evolved into a multilateral alliance in which the non Soviet Warsaw Pact members gained considerable scope for manoeuvre This book examines to what extent the Warsaw Pact inadvertently provided its members with an opportunity to assert their own interests emancipate themselves from the Soviet grip and influence Soviet bloc policy Laurien Crump traces this development through six thematic case studies which deal with such well known events as the building of the Berlin Wall the Sino Soviet Split the Vietnam War the nuclear question and the Prague Spring By interpreting hitherto neglected archival evidence from archives in Berlin Bucharest and Rome and approaching the Soviet alliance from a radically novel perspective the book offers unexpected insights into international relations in Eastern Europe while shedding new light on a pivotal period in the Cold War

Between Solidarity and Economic Constraints Christoph

Bernhardt, Andreas Butter, Monika Motylinska, 2023-04-27 Until the end of the Cold War in 1990 building projects and

architectural icons played an important role in the self portrayal of the competing systems However as the current research shows we also find a large variety of forms of cooperation between the East the South and the West not to forget the manifold cross border entanglements within the South or the East This book explores the intersection of two strands of research On the one hand interaction in the field of architecture and construction between actors from socialist countries and from countries of the Global South have increasingly won interest amongst historians of architecture and planning On the other hand in the context of the strongly emerging Cold War Studies scholars have explored cooperation and circulation across the Iron Curtain with a focus on economic and research planning This book connects perspectives of planning construction and architectural design with those on economic interests and conflicts in projects and networks Furthermore it opens the view to the hubs of communication and exchange and on patterns of longterm transformation and appropriation of architecture

Cold War Cultures Annette Vowinckel, Marcus M. Payk, Thomas Lindenberger, 2012 The Cold War was not only about the imperial ambitions of the super powers their military strategies and antagonistic ideologies It was also about conflicting worldviews and their correlates in the daily life of the societies involved The term Cold War Culture is often used in a broad sense to describe media influences social practices and symbolic representations as they shape and are shaped by

international relations Yet it remains in question whether or to what extent the Cold War Culture model can be applied to European societies both in the East and the West While every European country had to adapt to the constraints imposed by the Cold War individual development was affected by specific conditions as detailed in these chapters This volume offers an important contribution to the international debate on this issue of the Cold War impact on everyday life by providing a better understanding of its history and legacy in Eastern and Western Europe
