dealing explicitly with sex and sexuality **Indian Mass Media and the Politics of Change** Somnath Batabyal, Angad Chowdhry, Meenu Gaur, Matti Pohjonen, 2013-04-11 India has been the focus of international attention in the past few years. Rhetoric concerning its rapid economic growth and the burgeoning middle classes suggests that something new and significant is taking place. Something has changed: we are told India is shining, the elephant is rising, and the 21st century will be Indian. What unites these powerful reimaginings of the Indian nation is the notion of change and its many ramifications. Election campaigns, media commentators, scholars, activists, and drawing room debates all cut their teeth around this complex notion. Who is it that benefits from this change? Do such reimaginings of nationhood really reflect the complex social reality of large parts of the Indian population? The book starts with the premise that it is within the mass media where we can best understand how this change is imagined. From a kaleidoscope of perspectives, the book interrogates this articulation and the myriad forms it takes across India's newsrooms, television sets, cinema halls, mobile phones, and computer screens.

Polyphony Bridget Backhaus, 2021-07-29 This book looks at the rich and complex history of broadcasting and community broadcasting in the multicultural and multilingual milieu in India. It explores the world of community radio and how community radio broadcasters hear and speak to their audiences under the overarching theme of polyphony. The book discusses the socio-historical contexts which allowed community radio to thrive in India. It highlights its potential to create alternative spaces of representation and opportunity and its importance in preserving and disseminating local knowledge and traditions. The author weaves together ethnographic research and literature as well as personal narratives and stories of those involved in the field. Further, the monograph critically examines the impact of development agendas on community projects and processes, discussing in detail the pervasiveness of the development discourse in every aspect of community radio and how it manifests on air. It also illustrates the limitations of community radio within the context of its participation in the spectacle of development. Accessible and deeply insightful, this book will be of interest to researchers and students of cultural studies, sociology, social anthropology, media and communication studies, and South Asian studies. **Transnational**

Intellectual Property Rights and Communications in Asia Pradip Thomas, Jan Servaes, 2006-08-04 RIGHT WRONG LEGAL ILLEGAL Such simple binary notions cannot be used to assess issues related to intellectual property and communications One of the key dilemmas in the field of intellectual property rights today is the need for a system that rewards innovation and creativity while encouraging the social availability and distribution of ideas in the public domain And this is the balance that this volume sets out to strike With the ownership of IP becoming a core feature of media information industries and state policy issues related to access to knowledge and its use have become a matter of critical concern While trade regimes the state and the core cultural and information industries have begun to advocate greater scope for a variety of knowledge enclosures civil society is increasingly arguing for a people centred vision of knowledge futures This vision includes the need for equity based and flexible licensing regimes the legitimacy of local solutions to IP related issues support for cultural diversity and access to knowledge based on need rather than the ability to pay for knowledge The central

argument of this volume is that since access to knowledge in a knowledge economy is a passport to a better quality of life then its fair distribution and universal availability ought to become a standard norm The articles in this volume explore the contested nature of the ownership of and access to knowledge and support it with illustrative case studies from the Asian region Exhaustively discussed from the point of view of the dominant power interests as also the margins or indigenous communities this volume provides emerging solutions supportive of public domain
