More Than a Meal Karen Davis, 2001 This scholarly and authoritative book examines the cultural and literal history as well as the natural history and biological needs and concerns of turkeys Davis explores how turkeys came to be seen as birds who were not only the epitome of failure or stupidity but also the suitable centerpiece of the celebration of freedom in America itself Thanksgiving She examines the many varieties of turkeys and uncovers the methods by which millions of turkeys are raised fattened and slaughtered on farms around America today Davis takes us back to European folklore about turkeys the myths fairytales and downright lies told about turkeys and their habits and habitats She shows how turkeys in the wild have complex lives and family units and how they were an integral part of Native American and continental cultures and landscape before the Europeans arrived Finally Davis draws conclusions about our paradoxical complex and bestial relationship not just with turkeys but with all birds and thus with all other animals She examines how our treatment of animals shapes our other values about ourselves our relationship with other human beings and our attitude toward the land nation and the world

Make It a Green Peace! Frank Zelko, 2013-04-03 The emergence of Greenpeace in the late 1960s from a loose knit group of anti nuclear and anti whaling activists fundamentally changed the nature of environmentalism its purpose philosophy and tactics around the world And yet there has been no comprehensive objective history of Greenpeace's origins until now *Make It a*

Green Peace draws upon meeting minutes internal correspondence manifestos philosophical writings and interviews with former members to offer the first full account of the origins of what has become the most recognizable environmental non governmental organization in the world Situating Greenpeace within the peace movement and counterculture of the 1960s Frank Zelko provides a much deeper treatment of the group s groundbreaking brand of radical media savvy direct action environmentalism than has been previously attempted Zelko traces the complex intellectual and cultural roots of Greenpeace to the various protest movements of the 1950s and 1960s highlighting the influence of Quakerism with its practice of bearing witness Native American spirituality and the non violent resistance of Gandhi Unlike the more strait laced less confrontational Sierra Club and Audubon Society early Greenpeacers smoked dope dropped acid wore their hair long and put their bodies on the line interposing themselves between the harpoons of whalers and the clubs of seal hunters to save the animals and achieve what they hoped would be a lasting transformation in the way humans regarded the natural world And while it may not have achieved its most revolutionary goals Greenpeace inarguably created a heightened awareness of environmental issues that endures to this day Narrating the key campaigns and arguments among the group s early members Make It a Green Peace vividly captures all the drama pathos and occasional moments of absurd comic relief of Greenpeace s tumultuous first decade

A History of Environmentalism Marco Armiero, Lise Sedrez, 2014-07-31 Think globally act locally has become a call to environmentalist mobilization proposing a closer connection between global concerns local issues and individual responsibility A History of Environmentalism explores this dialectic relationship with ten contributors from a range of disciplines providing a history of environmentalism which frames global themes and narrates local stories Each of the chapters in this volume addresses specific struggles in the history of environmental movements for example over national parks species protection forests waste contamination nuclear energy and expropriation A diverse range of environments and environmental actors are covered including the communities in the Amazonian Forest the antelope in Tibet atomic power plants in Europe and oil and politics in the Niger Delta The chapters demonstrate how these conflicts make visible the intricate connections between local and global the body and the environment and power and nature A History of Environmentalism tells us much about transformations of cultural perceptions and ways of production and consuming as well as ecological and social changes More than offering an exhaustive picture of the entire environmentalist movement A History of Environmentalism highlights the importance of the experience of environmentalism within local communities It offers a worldwide and polyphonic perspective making it key reading for students and scholars of global and environmental history and political ecology

The Rights of Nature Roderick Frazier Nash, 1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic

This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader

Arctic Politics Oran R. Young, 2000-10-03 Long recognized by naturalists and adventurers as a dramatically unique region the Arctic has recently emerged as an area of increasing political strategic and economic importance The Arctic is both one of the world s largest and smallest regions encompassing 15% of the earth s land mass yet inhabited by fewer than 1% of the world s population Its physical vastness is coupled with a wealth of natural resources in oil alone the Far North contributes that majority of Russia s production and 25% of US output At the same time the Circumpolar North is home to diverse indigenous peoples and cultures thus setting the stage for conflicts of international scope In this collection of essays Oran Young provides a foundation for studying the politics of the Arctic as a distinctive international region Expanding the traditional approach to area studies he examines the Far North not only for its unique features but also as an arena within which to develop new approaches to various issues of worldwide interest Young challenges persistent stereotypes that marginalize the region moving beyond the romanticism of many observers to arrive at an understanding of the complex social and ecological systems of the Far North In doing so Young thoughtfully establishes the Arctic as an area of international importance both in its own right and in relation to other geopolitical regions

Wenzel, 1991-01-01 This study of the controversy surrounding the hunting of seals in the Canadian Arctic concentrates on the Inuit of Clyde River Baffin Island and traces the evolution of the traditional subsistence economy and social structure to the present cash economy and the effects of animal rights movements on the Inuit culture Extensive bibliography maps and glossary of Inuit sealing terms
