Saving Our World Endangered Sp:

Saving our World Heritage Hopkinson, Leo, 2022-12-31 **Saving Our Planet** Mostafa K. Tolba, 2012-12-06 *Saving Our Planet* analyses the changes both positive and negative that have occurred in the environment in the past two decades. It focuses not only on the state of the environment but also on the interactions between development activities and the environment. It highlights the main responses since 1972 to protect the environment. It is based on a wide ranging review of the scientific literature, UNEP reports and other sources and over 500 references are listed. *Saving Endangered Species* Robert W. Shumaker, 2020-10-27 The amazing true stories of the greatest wildlife champions of our time. Wildlife conservation is at a critical juncture. While large charismatic mammals may be the first animals that come to mind, the mere 3 000 wild tigers still in existence, the giraffes declared endangered for the first time just last year, it is not only these magnificent keystone species disappearing. A full third of all studied birds, reptiles and mammals have suffered devastating population losses and a third of all insects are now endangered, including crucial pollinators that sustain worldwide food supply. Over 15 000 animal species are now considered to be threatened with extinction. There are, however, bright spots that provide optimism, many of them due to the efforts of a small group of scientists and activists. In *Saving Endangered Species*, Robert W. Shumaker brings together ten conservation heroes, seven of them winners of the Indianapolis Prize, three of them recipients of the Jane Alexander Global Wildlife Ambassador Award. With moving immediacy, each wildlife defender offers their unique perspective on the state of wildlife conservation and the future of the natural world. Bringing to life their work in the field, each contributor also explains key concepts in wildlife conservation, reveals why they are important, and discusses what kinds of work can be done to address biodiversity loss. Contributors sharing their stories in their own words include George Schaller, one of the founding fathers of wildlife conservation who conducted the field work that resulted in the establishment of the world's largest wildlife preserve, the Arctic National Wildlife Refuge; Iain Douglas Hamilton, who is widely credited with developing the metrics and methods that stemmed the tide of elephant poaching for ivory in Africa; Steven Amstrup, who discovered the disturbing truth that the sea ice polar bears rely on for traveling, hunting, and raising their young was disappearing; Russell Mittermeier, who has discovered over 20 new animal species, conducted field work in more than 30 countries around the globe, and authored 15 books on biodiversity; Harrison Ford, Academy Award winning actor who has been a passionate wildlife advocate and board member of Conservation International for over 25 years; Sigourney Weaver, three time Academy Award nominee whose work with the Dian Fossey Gorilla Fund has helped save thousands of gorillas in Rwanda and Congo. This unique book aims to win new recruits, inspire biologists and conservationists already in the field, and illustrate the profession's fundamental scientific tenets through wildlife champions' own exciting narratives. Covering issues from reproduction and prey-predator relationships to population dynamics and community engagement, *Saving Endangered Species* also addresses such thorny topics as overhunting, retaliatory killing by farmers, development-driven habitat loss, and

the illegal wildlife trade By encompassing a broad spectrum of subjects this volume ultimately gives readers a first person look into what it takes to dedicate oneself to the crucial field of wildlife conservation Contributors Jane Alexander Steven C Amstrup George Archibald Michael I Crowther Iain Douglas Hamilton Harrison Ford Carl Jones Russell Mittermeier George B Schaller Robert W Shumaker Sigourney Weaver Patricia Chapple Wright **Save Our Species** ,1991 Coloring book includes 21 endangered and threatened plants and animals found in the United States such as the shortnose sturgeon dwarf wedge mussel Nashville crayfish red cockaded woodpecker eastern indigo snake Florida manatee Monito gecko Florida panther green pincher plant Mississippi sandhill crane Ozark big eared bat leopard darter Wyoming toad black lace cactus Attwater's great prairie chicken desert tortoise Valley Elderberry longhorn beetle mission blue butterfly Mauna Kea silversword bald eagle and the grizzly bear *Protect our planet* Romario Valentine,2022-09-01 Meet Romario Valentine an 11 year old eco warrior from Durban South Africa Through his tree planting beach clean ups avian art and other conservation projects in Africa and other parts of the world this young activist has become a dynamic campaigner for the future health of our planet In *Protect our Planet* Romario enthusiastically guides young nature lovers through key environmental topics from recycling and reforestation to pollution solutions and climate change Topics covered in this book overlap with the Foundation Phase curriculum and include The relationship between people and the environment renewable resources such as solar power forestation and why trees matter types of pollution and the problem with plastic reducing reusing and recycling climate change the importance of clean water craft ideas art activities and backyard projects Includes step by step projects suitable for Foundation Phase learners such as building a bug hotel birdfeeder and water filter Sales points Lively design with colourful illustrations and caricatures includes step by step projects and green tips explains environmental topics in an accessible and friendly way aligns with the National Curriculum for Foundation Phase Life Skills inspires children to take care of the environment *World Wildlife Conference: Efforts to Save Endangered Species* ,1973 **12 Small Acts to Save Our World** WWF,2018-09-20 _____ Ever wanted to save the world It's easy to feel like we can't make a difference But small easy actions if taken by enough people can move mountains and save planets Written in collaboration with leading environmental experts from WWF this short book provides simple changes we can all make to our everyday lives from morning to night These aren't the only things you can do Nor are they things you have to do But these 12 small acts are basic steps anybody can take and if even one of them sticks our children will inherit a better world Acts like Turning off devices instead of leaving them on standby Buying less cotton clothing a T shirt needs 2 400 litres of water to make Using reusable straws when possible Turning off the tap while you brush your teeth will take only moments but if enough people commit to them we can make a real difference to our planet _____ Now really is the time to act You don't have to be a superhero everyone can make a difference by following this book Ben Fogle **Eco Heroes: Adventures to Save Our Planet** Paul Stiling,2025-03-11 *Eco Heroes Adventures to Save Our Planet* by Paul Stiling
