Visions of the Human in Science Fiction and Cyberpunk, 2020-09-25 This collection of papers joins a growing body of work addressing what are arguably some of the most important questions faced in the 21st century what does it mean to be human and what do we understand by humanity

Human Shields Dr. Neve Gordon, Nicola Perugini, 2020-08-25 A chilling global history of the human shield phenomenon From Syrian civilians locked in iron cages to veterans joining peaceful indigenous water protectors at the Standing Rock Sioux Reservation from Sri Lanka to Iraq and from Yemen to the United States human beings have been used as shields for protection coercion or deterrence Over the past decade human shields have also appeared with increasing frequency in antinuclear struggles civil and environmental protests and even computer games The phenomenon however is by no means a new one Describing the use of human shields in key historical and contemporary moments across the globe Neve Gordon and Nicola Perugini demonstrate how the increasing weaponization of human beings has made the position of civilians trapped in theaters of violence more precarious

and their lives more expendable They show how the law facilitates the use of lethal violence against vulnerable people while portraying it as humane but they also reveal how people can and do use their own vulnerability to resist violence and denounce forms of dehumanization Ultimately Human Shields unsettles our common ethical assumptions about violence and the law and urges us to imagine entirely new forms of humane politics **Punk in Russia** Ivan Gololobov,Hilary Pilkington,Yngvar B Steinholt,2014-04-24 Punk culture is currently having a revival worldwide and is poised to extend and mutate even more as youth unemployment and youth alienation increase in many countries of the world In Russia its power to have an impact and to shock is well illustrated by the state response to activist collective and punk band Pussy Riot This book based on extensive original research examines the nature of punk culture in contemporary Russia Drawing on interviews and observation it explores the vibrant punk music scenes and the social relations underpinning them in three contrasting Russian cities It relates punk to wider contemporary culture and uses the Russian example to discuss more generally what constitutes punk today *Handbook on the Geographies of Power* Mat Coleman,John Agnew,2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war Occupying Habits Daniel Mann,2022-02-24 How did the Israeli military learn to cope with the ubiquity of media technologies that routinely document their power abuses Why did they re appropriate these to tighten their grip on Palestinian civilians This book explains why a high tech nation with advanced military technologies came to rely on the everyday media habits performed by soldiers and civilians Daniel Mann argues that the intensification of the security regime in Palestine and the increasingly personal use of media technologies by both soldiers and civilians are deeply entangled The book traces how beginning in the 1990s the integration of media into the lives of civilians and Israeli soldiers enabled Israel to transfer responsibilities to individual users who in turn became legally and ethically liable for state abuses of power Drawing on declassified documents found footage and social media Mann shows how both media and warfare have been remodelled around the figure of the defensive isolated and insular individual Mann suggests that the focus on representations and their close visual analysis paradoxically hinders our ability to understand media Instead of zooming into

fine details we must step back to reveal the assemblage of images users and infrastructure that together serve to maintain the racial legal and aesthetic divide between Israel and Palestine

Xu Bing and Contemporary Chinese Art Hsingyuan Tsao, Roger T. Ames, 2011-09-01 How Chinese is contemporary Chinese art Treasured by collectors critics and art world cognoscenti this art developed within an avant garde that looked West to find a language to strike out against government control Traditionally Chinese artistic expression has been related to the structure and function of the Chinese language and the assumptions of Chinese natural cosmology Is contemporary Chinese art rooted in these traditions or is it an example of cultural self colonization Contributors to this volume address this question going beyond the more obvious political and social commentaries on contemporary Chinese art to find resonances between contemporary artistic ideas and the indigenous sources of Chinese cultural self understanding Focusing in particular on the acclaimed artist Xu Bing this book looks at how he and his peers have navigated between two different cultural sites to establish a third place a place from which to appropriate Western ideas and use them to address centuries old Chinese cultural issues within a Chinese cultural discourse

Heritage and Debt David Joselit, 2020-03-10 How global contemporary art reanimates the past as a resource for the present combating modern art s legacy of Eurocentrism If European modernism was premised on the new on surpassing the past often by assigning it to the traditional societies of the Global South global contemporary art reanimates the past as a resource for the present In this account of what globalization means for contemporary art David Joselit argues that the creative use of tradition by artists from around the world serves as a means of combatting modern art s legacy of Eurocentrism Modernism claimed to live in the future and relegated the rest of the world to the past Global contemporary art shatters this myth by reactivating various forms of heritage from literati ink painting in China to Aboriginal painting in Australia in order to propose new and different futures Joselit analyzes not only how heritage becomes contemporary through the practice of individual artists but also how a cultural infrastructure of museums biennials and art fairs worldwide has emerged as a means of generating economic value attracting capital and tourist dollars Joselit traces three distinct forms of modernism that developed outside the West in opposition to Euro American modernism postcolonial socialist realism and the underground He argues that these modern genealogies are synchronized with one another and with Western modernism to produce global contemporary art Joselit discusses curation and what he terms the curatorial episteme which through its acts of framing or curating can become a means of recalibrating hierarchies of knowledge and can contribute to the dual projects of decolonization and deimperialization

The Language of War Monuments David Machin, Gill Abousnnouga, 2013-10-10 This book analyses war monuments by developing a multimodal social semiotic approach to understand how they communicate as three dimensional objects The book provides a practical tool kit approach to how critical multimodal social semiotics should be done through visual textual and material analysis It ties this material analysis into the social and political contexts of production Using examples across the 20th and 21st century the book's chapters offer a way of analysing the way that monument designers have used specific semiotic choices in terms of things like iconography objects shape form angularity height materials and surface realisation to place representations of war in public places across Britain This social semiotic approach to the study of war monuments serves three innovative purposes First it provides a contribution to the work on the ideological representations of war in Media and Cultural Studies and in Critical Discourse Analysis applied specifically to more banal realisations of discourse Second it responds to calls by historians for innovative ways to study war commemoration by providing an approach that offers both specific analysis of the objects and attends to matters of design Thirdly following in the relatively recent tradition of multimodal analysis the arguments draw on the ideas of Kress and van Leeuwen 1996 2001 adapting and extending their theories and models to the analysis of British commemorative war monuments in order to develop a multimodal framework for the analysis of three dimensional objects

Inquisition and Power John H. Arnold, 2013-07-20 What should historians do with the words of the dead Inquisition and Power reformulates the historiography of heresy and the inquisition by focusing on depositions taken from the Cathars a religious sect that opposed the Catholic church and took root in southern France during the twelfth century Despite the fact that these depositions were spoken in the vernacular but recorded in Latin in the third person and rewritten in the past tense historians have often taken these accounts as verbatim transcriptions of personal testimony This belief has prompted some historians including E Le Roy Ladurie to go so far as to retranslate the testimonies into the first person These testimonies have been a long source of controversy for historians and scholars of the Middle Ages Arnold enters current theoretical debates about subjectivity and the nature of power to develop reading strategies that will permit a more nuanced reinterpretation of these documents of interrogation Rather than seeking to recover the true voice of the Cathars from behind the inquisitor s framework this book shows how the historian is better served by analyzing texts as sites of competing discourses that construct and position a variety of subjectivities In this critically informed history Arnold suggests that what we do with the voices of history in fact has as much to do with ourselves as with those we seek to rescue from the silences of past
