SEMIOTICS:

An Introductory Anthology

Edited with Introductions by Robert E. Innis

Charles Morris once said that the concept of sign may prove as funda-
mental to the sciences of men as the concept of atom has been to the
physical sciences or the cell for biology. What is a sign? Why are there
signs? Where do signs come from? How many types and kinds of signs
are there? What is the basis for their classification? What are their respec-
tive powers? What are their uses? Semiotics deals with all these questions
and more. It is perhaps one of the most exciting contemporary intellec-
tual developments. The texts in this volume are *the* classic statements in
semiotics and touch on a vast set of problems and themes—philosophi-
cal, aesthetic, literary, cultural, biological, anthropological, and so on.
Authors represented are: Charles Sanders Peirce, Ferdinand de Saussure,
V. N. Vološinov, Karl Bühler, Susanne K. Langer, Claude Lévi-Strauss,
Gregory Bateson, Roman Jakobson, Charles Morris, Roland Barthes,
Meyer Schapiro, Émile Benveniste, Umberto Eco, René Thom, and
Thomas A. Sebeok.

ROBERT E. INNIS, Professor of Philosophy at the University of Lowell, has
published many articles in philosophy, semiotics, and social and cultural
theory and is the author of *Karl Bühler: Semiotic Foundations of Lan-
guage Theory* (Plenum) and the translator of *The Central Texts of Lud-
wig Wittgenstein*, by Gerd Brand (Basil Blackwell).

Innis,2010-11-01 Making sense of the world around us is a process involving both semiotic and material mediation the use of signs and sign systems preeminently language and various kinds of tools technics As we use them we experience them subjectively as extensions of our bodily selves and objectively as instruments for accessing the world with which we interact Emphasizing this bipolar nature of language and technics understood as intertwined forms of

sense Robert Innis studies the multiple ways in which they are rooted in and transform human perceptual structures in both their individual and social dimensions The book foregrounds and is organized around the notion of semiotic embodiment Language and technics are viewed as probes upon which we rely in which we are embodied and that themselves embody and structure our primary modes of encountering the world While making an important substantive contribution to present debates about the biasing of perception by language and technics Innis also seeks to provide a methodological model of how complementary analytical resources from American pragmatist and various European traditions can be deployed fruitfully in the pursuit of new insights into the phenomenon of meaning making
