Sense Of Learning:

Making Sense of Learning Norman Reid, Asma Amanat Ali, 2020-08-25 This textbook brings together findings from global research on teaching and learning with an emphasis on secondary and higher education The book is unique in that the content is selected in an original way and its presentation reflects the most recent research evidence related to understanding The book covers and presents themes that are based tightly on worldwide research evidence scrupulously avoiding opinion or any dependence on the personal experience of the authors The book starts by reflecting on educational research itself The four chapters that follow relate the story of the research that shows how all humans learn and the variations within that framework These chapters offer a tight framework that underpins much of the rest of the text The next four chapters look at the way school curricula are organised and how the performance of learners can be assessed They summarise the research evidence related to thinking skills and consider the importance of practical teaching This is followed by two chapters that draw from the extensive social psychology research on attitude development as it applies in education and then by two chapters that summarise the research related to major issues of controversy the performativity agenda and the issue of quality One chapter looks at the place of statistics in education The next two chapters look at the evidence that can support or undermine many typical education beliefs or myths and mirages Finally the last chapter brings it all together and looks into the future pointing to some areas where future research is likely to be helpful based on current knowledge

The Sense of Learning Ann E. Berthoff, 1990 In this book Ann Berthoff has posed three questions that frame the book's structure and whose answers frame her counterstatement Is teaching still possible Is learning still possible Is reading still possible

The HM Learning and Study Skills Program Judy Tilton Brunner, Matthew S. Hudson, 2016-10-14 Level III Grades 11-13 The HM Learning and Study Skills Program Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity-oriented units It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills more succinctly that learning by doing is the best way study smart Learning and study skills are important for learning They are methods and ways of doing things that help make learning easier Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time Just like any other skill knowing how to learn and study proficiently must be learned and practiced over time The Program has been designed to help students learn more efficiently and effectively
