**Anatomy of Spirituality: Portrait of the Soul** Chander Behl, 2015-04-27 The domain of spirituality separated from its theological overburden believes in the existence of a spiritual self presumed to be distinctly separate from the psychological self The spiritual eternal self also known as the soul or spirit sometimes supported by an overarching Spirit is asserted to be operating behind the ephemeral self This book takes a contrarian stance it argues that the premise of the soul concept is obtained through the magic of language maintained through the marvel of the brain's biochemistry and sustained through the mirage of the psychological juggernauts of the brain The magic the marvel and the mirage together bring about subtle shifts as the linguistic brain suppresses many psychological details habitually applies mental templates such as inversions and dichotomies and enhances its language by coining religious and spiritual metaphors The consequence of these changes is that the usual flickering self begins to be impressed by itself believing it is buttressed by something transcendental and eternal within the soul or the spirit The self although indoctrinated during its formative years also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas the overburden signifies as the legitimate proof for the eternal soul

*The Afterlives of Monuments* Deborah Cherry, 2015-09-07 South Asia is famous for its monuments past and present Monuments have been created destroyed and rescued by competing communities and incoming empires in the making and re making of history identity and memory This collection brings together an international cohort of senior scholars and younger researchers to examine the vast diversity of monuments and conceptions of monuments in South Asia from the 1850s to the present The chapters investigate what constitutes a monument and interrogate the conditions for its survival demise or recycling To explore the afterlives of monuments is to investigate how where when and why monuments have been remodelled re sited destroyed defaced or abandoned It is to investigate the theories of memory history and community as well as new forms of artistic practice and global media As different South Asian communities claim a stake in the making of national religious cultural and local identities and histories the status of monuments and debates about cultural memory have become increasingly urgent This book was published as a special issue of South Asian Studies

Animal Symbolicum Ivan D. Ivić, 2024-02-24 This book renews the concept of the symbolic function exploring human capacity to create and utilize symbols semiotic systems and realities It offers a unique theoretical perspective on the early psychological growth of children focusing on the symbolic function's role in their development In this sense it offers new conception of the emergence of symbolic function and language It further presents detailed analyses of semiotic function manifestations and their integration around age three signifying a child's entry into the symbolic species and its profound influence on overall mental development This book deals with issues related to the symbolic function in general as well as its origin and development It further presents detailed analyses of semiotic function manifestations and their integration around age three signifying a child's entry into the symbolic species and its profound influence on overall mental development This text serves as a valuable academic resource for university teachers researchers and students interested in gaining a comprehensive understanding of the complex interplay between cognitive socio emotional development and social practices in the emergence of symbolic function in early childhood

**Discoveries: Signs, Symbols and Ciphers** Georges Jean, 1998-10 To communicate people have always used signs and symbols marks gestures and words that represent abstract ideas and concrete objects Over time these have multiplied into an immense and complex network of images figures emblems We use signs to measure such difficult concepts as number danger value distances in time and space and even love How does a sign represent the thing for which it substitutes How do we come to understand the meaning of a written symbol What happens when a sign crosses international borders of language and culture Chapter by chapter Georges Jean conducts us through the fascinating realm of maps pictograms logographs letterforms patterns signals codes and facial expressions

**Signals and Perception** David Roberts, 2002 Signals and Perception provides a coherent survey of our understanding of how we interact with the environment via our senses Offering a unified treatment of the senses hearing and balance vision touch and pain smell and taste and assuming little prior knowledge of the field the text should be useful for students on a wide variety of courses in psychology biology and neuroscience

**Natural Symbols; Explorations in Cosmology** Mary Douglas, 1973 Every natural symbol derived from blood breath or excrement carries a social meaning and this work focuses on the ways in which any one culture makes its selections from body symbolism Each person treats their body as an image of society and the author examines the varieties of ritual and symbolic expression and the patterns of social ritual in which they are embodied Natural Symbols is a book about religion and it concerns our own society at least as much as any other It has stimulated new insights into religious and political movements and has provoked re appraisals of current progressive orthodoxies in many fields As a classic it represents a work of anthropology in its widest sense exploring themes such as the social meaning of natural symbols and the image of the body in society which are now very much in vogue in anthropology sociology and cultural studies
