Sensedata And Perception Ge Moore And Aj Ayer:

The Metaphysics of G. E. Moore David O'Connor, 2012-12-06 In this book setting aside his consideration of specifically ethical topics I try to provide a comprehensive interpretation of Moore's thought. Against the background of this general interpretation I examine in detail his work on some of the central problems of metaphysics and because Moore's being able to sustain a consistent anti-skepticism is essential to the survival of the base from which he works on those problems of epistemology too. The interpretation of which I speak involves my taking as the centerpiece of Moore's philosophical work his book *Some Main Problems of Philosophy* written in 1910 as the text of a lecture series but left unpublished for over forty years thereafter. That book is aptly titled for the issues with which Moore deals in it are indeed among the main problems of philosophy. Not least of these are the problems of formulating a general categorical description of the world and then of defending that formulation. However while I will discuss Moore's work in light of its contribution to this project of taking metaphysical inventory it is important to note that he in common with many other major figures in contemporary analytical philosophy did not approach specific philosophical puzzles with a view to possibly integrating solutions to them into a comprehensive theory about reality as a whole that is into what might be called a metaphysical system. **Berkeley's**

Merleau-Ponty and Contemporary Philosophy of Perception Peter Antich, 2023-08-04 This book draws on Merleau-Ponty's phenomenology to develop new and promising solutions to contemporary debates about perception. In providing an extension and defense of Merleau-Ponty's account of perceptual content and of the relation between perception and the world it demonstrates the value of Merleau-Ponty's insights for philosophy of perception today. The author focuses on two main topics: the contents and the nature of perception. In the first half of this book the author tackles debates about the content of perception: namely, what sorts of properties or features of the world reveal themselves to us in perception and in what modes. Drawing on Merleau-Ponty's description of perceptual sense the author argues that perception has a unique kind of content which cannot be adequately described in terms of sensations or concepts. He then shows how this account of perceptual sense can clarify debates about the richness of perceptual content including whether we can perceive moral properties. In the second half he turns to the nature of perception. Here he argues that Merleau-Ponty's account of perceptual intentionality makes available a powerful combination of the core insights of two main contemporary approaches to this question: realism and intentionalism. The author shows how this combination can be developed, defends it from objections and explains how it is equipped to deal with problems posed by the existence of illusions and hallucinations. *Merleau-Ponty and Contemporary Philosophy of Perception* will appeal to scholars and advanced students working on phenomenology and the philosophy of perception. **Sensation and Perception** D. W. Hamlyn, 2022-09-01 First published in 1961 *Sensation and Perception* aims to cast light upon the nature of perception itself. This the author believes can be achieved only through an

understanding of the concepts of sensation and perception A survey of the principal attempts to arrive at such an understanding brings out the fact that perception has most often been assimilated to sensation or judgment The author believes that both of these views are wrong but that an attention to the history of thought can provide an explanation of the temptation to accept them A final chapter gives the author s own views on the nature of sensation and perception As such it would be of interest both to philosophers and to those psychologists who are concerned with the nature of perception

Philosophy of Mind in the Twentieth and Twenty-First Centuries Amy Kind,2018-07-06 While the philosophical study of mind has always required philosophers to attend to the scientific developments of their day from the twentieth century onwards it has been especially influenced and informed by psychology neuroscience and computer science Philosophy of Mind in the Twentieth and Twenty First Centuries provides an outstanding survey of the most prominent themes in twentieth century and contemporary philosophy of mind It also looks to the future offering cautious predictions about developments in the field in the years to come Following an introduction by Amy Kind twelve specially commissioned chapters by an international team of contributors discuss key topics thinkers and debates including the phenomenological tradition the mind body problem theories of consciousness theories of perception theories of personal identity mental causation intentionality Wittgenstein and his legacy cognitive science and future directions for philosophy of mind Essential reading for students and researchers in philosophy of mind and philosophy of psychology Philosophy of Mind in the Twentieth and Twenty First Centuries is also a valuable resource for those in related disciplines such as psychology and cognitive science

Michael Beaney, 2013-06-20 During the course of the twentieth century analytic philosophy developed into the dominant philosophical tradition in the English speaking world In the last two decades it has become increasingly influential in the rest of the world from continental Europe to Latin America and Asia At the same time there has been deepening interest in the origins and history of analytic philosophy as analytic philosophers examine the foundations of their tradition and question many of the assumptions of their predecessors This has led to greater historical self consciousness among analytic philosophers and more scholarly work on the historical contexts in which analytic philosophy developed This historical turn in analytic philosophy has been gathering pace since the 1990s and the present volume is the most comprehensive collection of essays to date on the history of analytic philosophy It contains state of the art contributions from many of the leading scholars in the field all of the contributions specially commissioned The introductory essays discuss the nature and historiography of analytic philosophy accompanied by a detailed chronology and bibliography Part One elucidates the origins of analytic philosophy with special emphasis on the work of Frege Russell Moore and Wittgenstein Part Two explains the development of analytic philosophy from Oxford realism and logical positivism to the most recent work in analytic philosophy and includes essays on ethics aesthetics and political philosophy as well as on the areas usually seen as central to analytic philosophy such as philosophy of language and mind Part Three explores certain key themes in the history of analytic philosophy **Aspects of Psychologism** Tim Crane, 2014-01-02 Tim Crane takes up fundamental philosophical questions of consciousness perception and the experience of our own mental lives Psychologism in his formulation investigates the mind not only empirically and conceptually but also phenomenologically through the systematic examination of consciousness and thought from the subject's point of view **Perception** Frank Jackson, 1977-05-05 What is the nature of and what is the relationship between external objects and our visual perceptual experience of them In this book Frank Jackson defends the answers provided by the traditional Representative theory of perception He argues among other things that we are never immediately aware of external objects that they are the causes of our perceptual experiences and that they have only the primary qualities In the course of the argument sense data and the distinction between mediate and immediate perception

receive detailed defences and the author criticises attempts to reduce perceiving the believing and to show that the Representative theory makes the external world unknowable Jackson recognises that his views are unfashionable but argues in detail that they are to be preferred to their currently favoured competitors It will become an obvious point of reference for all future work on the philosophy of perception *The Epistemology of the Cyrenaic School* Voula Tsouna, 1998-12-10 The Cyrenaic school was a fourth century BC philosophical movement related both to the Socratic tradition and to Greek Scepticism In ethics Cyrenaic hedonism can be seen as one of many attempts made by the associates of Socrates and their followers to endorse his ethical outlook and to explore the implications of his method In epistemology there are close philosophical links between the Cyrenaics and the Sceptics both Pyrrhonists and Academics There are further links with modern philosophy as well for the Cyrenaics introduced a form of subjectivism which in some ways preannounces Cartesian views endorsed by Malebranche and Hume and developed by Kant This 1998 book reconstructs Cyrenaic epistemology explains how it depends on Cyrenaic hedonism locates it in the context of ancient debates and discusses its connections with modern and contemporary epistemological positions **Russell's Theory of Perception** Sajahan Miah, 2006-05-30 In Russell's Theory of Perception Sajahan Miah re-examines and evaluates the development of Russell's concept of perception and the relation of perception to our knowledge of the external world With the introduction of logical construction in which physical objects are constructed from actual and possible sense data Russell's theory of perception seems to become a causal theory with phenomenalist overtones The book argues that there is a consistency of purpose and direction which motivated Russell to introduce logical construction The purpose was to strike a compromise between his empiricism and his realism and to establish a bridge between the objects of perception and the objects of physics and common sense Perceptual Knowledge Georges Dicker, 2012-12-06 This book grew out of the lectures that I prepared for my students in epistemology at SUNY College at Brockport beginning in 1974 The conception of the problem of perception and the interpretation of the sense datum theory and its supporting arguments that are developed in Chapters One through Four originated in these lectures The rest of the manuscript was first written during the 1975-1976 academic year while I held an NEH Fellowship in Residence for College Teachers at Brown University and during the ensuing summer under a SUNY Faculty Research Fellowship I wish to express my sincere gratitude to the National Endowment for the Humanities and to the Research Foundation of the State University of New York for their support of my research I am grateful to many former students colleagues and friends for their stimulating constructive comments and criticisms Among the former students whose reactions and objections were most helpful are Richard Motroni Donald Callen Hilary Porter and Glenn Shaikun Among my colleagues at Brockport I wish to thank Kevin Donaghy and Jack Glickman for their comments and encouragement I am indebted to Eli Hirsch for reading and commenting most helpfully on the entire manuscript to Peter M Brown for a useful correspondence concerning key arguments in Chapters Five and Seven to Keith Lehrer for a criticism of one of my

Spectator in the Cartesian Theater Peter Slezak, 2023-08-01 The Cartesian Theater is Dennett's famous metaphor for
the idea that a homunculus or little man watches the screen on which our thoughts appear However contrary to much
academic teaching and scholarship Spectator in the Cartesian Theater Where Theories of Mind Went Wrong since Descartes
shows that Descartes was not guilty of this fallacy for which he has been blamed In his physiological writings neglected by
philosophers Descartes explained that the pseudo explanation arises not from what is included in our theory of consciousness
but rather from what is missing We fail to notice that the theory is incomplete because we are intuitively doing part of the
explanatory work That is we are the spectators in the Cartesian Theater With detailed critiques Peter Slezak shows that
Searle's Chinese Room Argument Kripke's theory of proper names Davidson's semantics of natural language and Kosslyn's
theory of visual imagery rely on what is intuitively meaningful to us rather than what follows from the theory Slezak offers a
novel solution to the elusive logic of the Cogito argument showing it to be akin to the Liar Paradox Since Descartes' perplexity
is our own this shows how the subjective certainty of consciousness and the mind body problem can arise for a physical
system An intelligent computer would think that it isn't one **Perception** Don Locke, 2002 This volume is a comprehensive
collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed

versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality *Knowledge, Mind, and the Given* Willem A. DeVries, Timm Triplett, Wilfrid Sellars, 2000-01-01 This book serves three purposes and it serves them very well First it patiently accurately and comprehensively supplies the necessary information about the historical and contemporaneous ideas views problems and theories which constitute the conceptual setting for Sellars's theses and argumentation Second it provides a careful and lucid section by section interpretative explanation of Sellars's own principal views and claims and crucially undertakes to support them And third it offers its readers the beginnings of an engaged critical discussion of Sellars's critique of givenness and epistemological foundationalism What is particularly impressive about this work is its marvelous clarity a highly polished accessible text Jay F Rosenberg Taylor Grandy Professor of Philosophy University of North Carolina Chapel Hill
