ROSELLINI (cl) Payton Smith,1997 **Regulation of Haemoglobin Synthesis** J. Neuwirt,P. Ponka,2012-12-06

Haemoglobin is one of the most important molecules in the animal kingdom Its function is to carry oxygen to tissues In lower invertebrates the blood pigment is present in the haemolymph and is not bound in cells Later in the course of phylo genesis haemoglobin remains associated with cells which produce it and in this form it reaches the peripheral circulation In higher organisms the haemoglobin production is thus determined by two main factors haemoglobin synthesis in erythroid cells and the formation of these erythroid cells which depends on cell proliferation in haematopoietic organs Human haemoglobin is made up of two chains which combine from four different polypeptide chains formed in varying ratios in different periods of the life cycle During the life span of humans the following haemoglobins are formed embryonic haemoglobins Gower 1 and 2 foetal haemoglobin F and two adult haemoglobins A and A E and IX chains are part of the embryonic haemoglobins Gower 1 E4 and 2 Gower 2 1X2E2 These haemoglobins predominate in embryos during the second month of pregnancy and at the end of the first trimester they are completely re placed by foetal haemoglobin F Y2 Adult haemoglobin A consists of two IX and two chains and is the main component of red cells in adults A relatively small component of red cells accounting for less than 2 % of the total haemo globin is haemoglobin A2 1X0 *Brenton's Septuagint, Restored Names Version, Volume 1* Clinton R Smith,2014-04-11 The Septuagint is the only extant Greek translation from a Hebrew MSS that is currently lost to us The Greek Septuagint and its Autograph were extensively used before the Christian era as has been testified to by historians and many similarities manifest in the Dead Sea Scrolls During the age of the Messiah and the Apostles it appears they exclusively used either the Greek Septuagint or its Autograph as is demonstrated by the parallels found in their quotes from the Hebrew Scriptures O T The Septuagint persevered into the age of the early Church Fathers where after it inexplicably fell into disuse This is a fresh approach to Sir Brenton s translation in that this it restores the original Hebrew Names as found in the Masoretic Text While this approach may seem like a glaring paradox it may however be reasoned that a more satisfying though not perfect English translation has subsequently evolved *Early English Text Society: The Chester Plays* ,1968
