Sensing Corporeally Floyd Merrell, 2003-01-01 Focusing on analogical sensing rather than digital reasoning Merrell argues that human sensation and cognition should be thought of in terms of continually changing signs that can be accounted for in terms of topological forms

**Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma** Mohammad H. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schr dinger s Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary

scientists and scholars in the field This study is the first in the monograph series Tayyebbeh Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinary through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of Disciplinary Decadence Living Thought in Trying Times Routledge Paradigm 2006 and Freedom Justice and Decolonization Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi s Liberating Sociology succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help

us to understand the human universe no less than the physical universe Just as my Creating Life Before Death challenges bureaucracy s conformist orientation so does Liberating Sociology liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

Posthuman Pathogenesis Başak Ağin,Şafak Horzum,2022-07-07 This multi vocal assemblage of literary and cultural responses to contagions provides insights into the companionship of posthumanities environmental humanities and medical humanities to shed light on how we deal with complex issues like communicable diseases in contemporary times Examining imaginary and real contagions ranging from Jeep and SHEVA to plague HIV AIDS and COVID 19 Posthuman Pathogenesis discusses the inextricable links between nature and culture matter and meaning making practices and the human and the nonhuman Dissecting pathogenic nonhuman bodies in their interactions with their human counterparts and the environment the authors of this volume raise their diverse voices with two primary aims to analyse how contagions trigger a drive to survival and chaotic liberating and captivating impulses and to focus on the viral interpolations in socio political and environmental systems as a meeting point of science technology and fiction blending social reality and myth Following the premises of the post qualitative turn and presenting a differentiated experience of contagion this rhizomatic compilation thus offers a non hierarchised array of essays composed of a multiplicity of genders geographies and generations Returning Learning Simone M. Blom,2024-12-30 Returning Learning explores early school years teachers perceptions of nature and how this informs their pedagogy through a posthuman theoretical framework The theoretical framework is purposefully designed to disrupt dichotomies and reject abuse to marginalised others In doing so this book offers a reconceptualisation of learning in environmental education and education more broadly The posthuman theoretical framework is a transdisciplinary offering informed by material discursive practices affective atmospheres and childhoodnature The theoretical framework and transqualitative methodology support diffractive ethnographic methods where data are generated through an iterative and entangled data collection and data analysis process This process is presented as a series of diffractive data entanglements that explore teachers perceptions of nature their pedagogical practices and the implications of these data through a posthuman framing These non conventional approaches to undertaking research are the foundation for this book that listens to teacher s voices by conducting research with teachers rather than to teachers Through a deep exploration into the intricacies of everyday classroom practices and happenings this book privileges the voices of the teachers and the nonhuman thus the response ability of teachers to their students and the planet is re turned It will be of interest to researchers who are interested in creative and innovative theories and methodologies as well as those studying environmental education and

consensus appears to be emerging assuming that the conscious mind and the functioning brain are two aspects of a complex system that interacts with the world How can this concept of reality one that includes the existence of consciousness be approached both philosophically and scientifically The Unity of Mind Brain and World is the result of a three year online discussion between the authors who present a diversity of perspectives tending towards a theoretical synthesis aimed to contribute to the insertion of this field of knowledge in the academic curriculum Sport, Physical Culture, and the Moving Body Joshua I. **Animals, Machines, and AI** Erika Quinn, Holly Yanacek, 2021-11-08 Sentient animals machines and robots abound in German literature and culture but there has been surprisingly limited scholarship on non human life forms in German studies This volume extends interdisciplinary research in emotion studies to examine non humans and the affective relationships between humans and non humans in modern German cultural history In recent years fascination with emotions developments in robotics and the burgeoning of animal studies in and beyond the academy have given rise to questions about the nature of humanity Using sources from the life sciences literature visual art poetry philosophy and photography this collection interrogates not animal or machine emotions per se but rather uses animals and machines as lenses through which to investigate human emotions and the affective entanglements between humans and non humans The COVID 19 pandemic made us more keenly aware of the importance of both animals and new technologies in our daily lives and this volume ultimately sheds light on the centrality of non humans in the human emotional world and the possibilities that relationships with non humans offer for enriching that world Watch our talk with the editors Erika Quinn and Holly Yanacek here [https://youtu.be/RBMwXah\\_Om8](https://youtu.be/RBMwXah_Om8)

**Upside-Down Gods** Peter Harries-Jones, 2016-05-02 This intellectual biography covers the trajectory of Bateson's career from his anthropological work in Bali alongside his wife Margaret Mead to his contributions to family therapy in the United States and to studies of recursion as a feature of communication patterns in both the human and in the animal world Layers of feedback with their many differing contexts highlight the presence of meaning in social relations in contrast to that absence of meaning purposefully proposed within information theory Throughout the human and in the animal world recursion of feedback accounts for grasp of patterns their difference and with ability to communicate enable transduction of perceptions of difference Bateson's insistence on feedback and communication re frames many aspects of culture psychology biology and evolution His legacy is recognized as an important precursor to the formation of a new science called Biosemiotics Harries Jones argues that Bateson turns conventional causality upside down through showing how humanity's perceptions as with perceptions of all sentient beings are anticipative All sentient beings abduct

from recursive patterns rather than relying on linear evidence gathered about time space movements of objects Thus circular pattering provides clearer perceptions of the difference between sustainable creativity and current biocide between our appreciation of nature s aesthetics and time space games of power which underlie so many social and biological theories

**Bridging the Gap between Life and Physics** Ron Cottam,Willy Ranson,2018-03-19 This is the only book which deals with the correlatory comparison between hierarchical living systems and inorganic physical ones The culmination of the book is the proposition of research to discover and understand the natural underlying level of organization which produces the descriptive commonality of life and physics Traditional science eliminates life from its purview by its rejection of interrelationships as a primary content of systems The conventional procedure of science is that of reductionism whereby complex systems are dismantled to characterize lower level components but virtually no attention is given to how to rebuild those systems the underlying assumption is that analysis and synthesis are symmetrical This book fulfills two main coupled functions Firstly it details hierarchy as the major formulation of natural complex systems and investigates the fundamental character of natural hierarchy as a widely transferable container of structure and or function and this in the case of the new development of a representational or model hierarchy Secondly it couples this hierarchical description to that of the electronic properties of semiconductors as a well modeled canonical example of physical properties The central thesis is that these two descriptions are comparable if care is taken to treat logical and epistemological aspects with prudence a large part of the book is composed of just this aspect of care for grounding consistency As such great attention is given to correct assessment of argumentative features which are otherwise presumed known but which are usually left uncertain Development of the ideas is always based on a relationship between entity or phenomenon and their associated ecosystems and this applies equally well to the consequent derivations of consciousness and information

**Assembling and Governing Habits** Tony Bennett,Ben Dibley,Gay Hawkins,Greg Noble,2021-07-22 The increasing significance of managing or changing habits is evident across a range of pressing contemporary issues climate change waste management travel practices and crowd control Assembling and Governing Habits engages with the diverse ways in which habits are governed through the knowledge practices and technologies that have been brought to bear on them The volume addresses three main concerns The first focuses on how the habit discourses proposed by a range of disciplines have informed the ways in which different forms of expertise have shaped the ways in which habits have been managed or changed to bring about specific social objectives The second concerns the ways in which habits are acted on as aspects of infrastructures which constitute the interfaces through which technical systems human conducts and environments are acted on simultaneously The third concerns the specific ways in which habit discourses and habit infrastructures are brought together in the regulation of city habits that is habits which have specific qualities arising out of the specific conditions the rhythms and densities of urban life and ones which in the wake of the COVID 19 pandemic have been profoundly disrupted Written in a clear and direct style the

Hoeg,K. Larsen,2006-10-17 Driven by such diverse advances as the Human Genome Project and the explosion of the World Wide Web and also by the threat of human inspired disasters such as global warming the field of science and literature studies is currently undergoing an unprecedented expansion The relations between science and literature have been and continue to be central to understanding Hispanic civilization and culture In spite of this Science Literature and Film in the Spanish Speaking World is the first and only book to treat this new and dynamic field from an Hispanic perspective This unique volume opens the door to an entirely new focus in the study of Hispanic literature and culture      **Entangling Forms** Floyd Merrell,2010-09-27 The volume draws from Charles S Peirce s pragmatic philosophy as well as from diverse areas in contemporary arts and sciences and certain facets of Buddhist philosophy especially regarding notions of interconnectedness self organization and co participation of the knowing subject with her inner world her socio cultural world and her physical environment Contradictory complementary and coalescence are also fundamental watchwords in addition to entanglement Contradictory since conflicts clashes and inconsistencies there will always be in spite attempts to resolve them Complementarity since poles of opposition can at least provisionally be resolved by mediation and moderation however vaguely and ambiguously such that consonance might emerge from dissonance balance from imbalance and accord from discord And coalescence since the union of disparities is an ongoing and always incomplete process it is never fixed product These concepts along with the key word entanglement place Peirce in a new light giving rise to new questions and possible responses from readers who are searching for alternate means of understanding in our increasingly complex rapidly globalizing world
