through Iran to Central America He traces how after 9 11 torture became Washington s weapon of choice in both the CIA s global prisons and in torture friendly countries to which detainees are dispatched Finally McCoy argues that information extracted by coercion is worthless making a case for the legal approach favored by the FBI Scrupulously documented and grippingly told A Question of Torture is a devastating indictment of inhumane practices that have spread throughout the intelligence system damaging American s laws military and international standing Civilizing Torture W. Fitzhugh Brundage,2020-03-10 Pulitzer Prize Finalist Silver Gavel Award Finalist A sobering history of how American communities and institutions have relied on torture in various forms since before the United States was founded Los Angeles Times That Americans as a people and a nation state are violent is indisputable That we are also torturers domestically and internationally is not so well established The myth that we are not torturers will persist but Civilizing Torture will remain a powerful antidote in confronting it Lawrence Wilkerson former Chief of Staff to Secretary of State Colin Powell Remarkable A searing analysis of America s past that helps make sense of its bewildering present David Garland author of Peculiar Institution Most Americans believe that a civilized state does not torture but that belief has repeatedly been challenged in moments of crisis at home and abroad From the Indian wars to Vietnam from police interrogation to the War on Terror US institutions have proven far more amenable to torture than the nation s commitment to liberty would suggest Civilizing Torture traces the history of debates about the efficacy of torture and reveals a recurring struggle to decide what limits to impose on the power of the state At a time of escalating rhetoric aimed at cleansing the nation of the undeserving and an erosion of limits on military power the debate over torture remains critical and unresolved **Project Mind Control** John Lisle,2025-05-20 The inside story of the CIA s secret mind control project MKULTRA using never before seen testimony from the perpetrators themselves Sidney Gottlieb was the CIA s most cunning chemist As head of the infamous MKULTRA project he oversaw an assortment of dangerous even deadly experiments Among them dosing unwitting strangers with mind bending drugs torturing mental patients through sensory deprivation and steering the movements of animals via electrodes implanted into their brains His goal was to develop methods of mind control that could turn someone into a real life Manchurian candidate In conjunction with MKULTRA Gottlieb also plotted the assassination of foreign leaders and created spy gear for undercover agents The details of his career however have long been shrouded in mystery Upon retiring from the CIA in 1973 he tossed his files into an incinerator As a result much of what happened under MKULTRA was thought to be lost until now Historian John Lisle has uncovered dozens of depositions containing new information about MKULTRA straight from the mouths of its perpetrators For the first time Gottlieb and his underlings divulge what they did why they did it how they got away with it and much more Additionally Lisle highlights the dramatic story of MKULTRA s victims from their terrible treatment to their dogged pursuit of justice The consequences of MKULTRA still reverberate throughout American society Project Mind Control is the definitive account of this most disturbing of chapters in CIA history **Encountering Affect**

Ben Anderson,2017-03-02 Since the mid 1990s affect has become central to the social sciences and humanities Debates abound over how to conceptualise affect and how to understand the interrelationships between affective life and a range of contemporary political transformations In *Encountering Affect* Ben Anderson explores why understanding affect matters and offers one account of affective life that hones in on the different ways in which affects are ordered Intervening in debates around non representational theories he argues that affective life is always already mediated the never finished product of apparatuses encounters and conditions Through a wide range of examples including dread debility dependency in torture ordinary hopes and precariousness Anderson shows the significance of affect for understanding life today [The Cybernetic Brain](#)

Andrew Pickering,2010-04-15 Cybernetics is often thought of as a grim military or industrial science of control But as Andrew Pickering reveals in this beguiling book a much more lively and experimental strain of cybernetics can be traced from the 1940s to the present *The Cybernetic Brain* explores a largely forgotten group of British thinkers including Grey Walter Ross Ashby Gregory Bateson R D Laing Stafford Beer and Gordon Pask and their singular work in a dazzling array of fields Psychiatry engineering management politics music architecture education tantric yoga the Beats and the sixties counterculture all come into play as Pickering follows the history of cybernetics impact on the world from contemporary robotics and complexity theory to the Chilean economy under Salvador Allende What underpins this fascinating history Pickering contends is a shared but unconventional vision of the world as ultimately unknowable a place where genuine novelty is always emerging And thus Pickering avers the history of cybernetics provides us with an imaginative model of open ended experimentation in stark opposition to the modern urge to achieve domination over nature and each other **Gnosis**

Daniel Merkur,1993-01-01 Traces the use of powerful gnostic visionary techniques from Hellenistic Gnosticism and Jewish merkabah mysticism through Muhammad the Ismaeilis and theosophical Sufism to medieval neoplatonism and renaissance alchemy [Breakthrough](#)
