Smart Drugs, Attention Doping, and Screen Addicts Kenneth J. Saltman, 2025-07-24 With this book Kenneth J Saltman argues that drugs are at the center of the most significant transformations of schooling Children are increasingly being drugged to compete on standardized tests to increase their attention levels in school and are being diagnosed with ADHD at

exponentially increasing rates Saltman describes the material stakes in what he calls the education drugs attention complex namely educational profiteering through the mutually supportive sales of drugs and testing products drugs and digital screen technologies drugs and trauma resilience programs and drugs and the school to prison pipeline He shows how each of these examples are part of a vast interlocking drug and attention industry in which pharma and tech companies are commercializing and producing youth problems for profit and are targeting the most vulnerable young people The book covers the prevalence of screen addiction the misuse of hormone therapies for transgenders youth anxiety and trauma medication the connection between race and drugs and in the final chapter offers critical democratic and practical solutions for educators and policy makers to tackle these issues Determinants of Substance Abuse Mark Galizio, Stephen A.

Maisto, 2013-06-29 With the recent increase in the scope of drug and alcohol problems has come an awareness of the need for solutions In this context federal support for research on drug problems increased tremendously during the last 10 to 15 years with the establishment of the National Institute on Drug Abuse NIDA and the National Institute on Alcohol Abuse and Alcoholism NIAAA Funding from these and other sources has led to a substantial increase in the quantity and quality of published work related to substance abuse As data accumulate it is becoming more apparent that substance abuse problems are extremely complex and are influenced by a variety of biological psychological and environmental variables Unfortunately it has proved difficult to go beyond this conclusion to a description of how these multiple factors work together to influence the development of and recovery from drug and alcohol dependence The purpose of this book is to try to meet that objective by including in one volume literature reviews and theoretical analyses from a wide variety of drug researchers We chose the authors in an attempt to assure that each of the various levels of analysis appropriate to the substance abuse problems would be included In each case the author was asked to consider how the variables in his or her particular domain might contribute to the appearance of individual differences in both alcohol and drug problems **The Student'S Guide**
