*Maternal Bodies* Nora Doyle, 2018-03-19 In the second half of the eighteenth century motherhood came to be viewed as women's most important social role and the figure of the good mother was celebrated as a moral force in American society Nora Doyle shows that depictions of motherhood in American culture began to define the ideal mother by her emotional and spiritual roles rather than by her physical work as a mother As a result of this new vision lower class women and non white women came to be excluded from the identity of the good mother because American culture defined them in terms of their physical labor However Doyle also shows that childbearing women contradicted the ideal of the disembodied mother in their personal accounts and instead perceived motherhood as fundamentally defined by the work of their bodies Enslaved women were keenly aware that their reproductive bodies carried a literal price while middle class and elite white women dwelled on the physical sensations of childbearing and childrearing Thus motherhood in this period was marked by tension between the lived experience of the maternal body and the increasingly ethereal vision of the ideal mother that permeated American print culture

*Putting Trauma to Sleep* Jaan Reitav, Celeste Thirlwell, 2025-02-18 Sleep disturbances and trauma are intrinsically linked so why aren't therapists trained in sleep repair? Anyone who has suffered from trauma knows what it means to have sleepless nights. In fact, research has shown that at the heart of both trauma and sleep disorders is a dysregulated brainstem with heightened sympathetic nervous system activity. Yet current trauma treatments largely ignore this profound interconnection between trauma and sleep. *Putting Trauma to Sleep* proposes that incorporating a therapeutic TABS model (traumatic events, attachment disturbances, bodily symptoms) sleep repair therapists can better aid their clients in both healing from trauma and restoring sleep. With practical clinical approaches and illustrative case examples, sleep specialists Jaan Reitav and Celeste Thirlwell demonstrate how therapists and their clients can integrate sleep repair into trauma work by enhancing parasympathetic nervous system tone and actively attending to shock reactions in the body. Dysfunctional sleeping patterns have been ignored for too long within the psychotherapy sphere; this indispensable resource will transform readers' understanding of both sleep and trauma therapy.
