

# Separation-Individuation

## Theory of child development

- **Object Constancy** - The phase when the child understands that the mother has a separate identity and is truly a separate individual. This leads to the formation of **Internalization**, which is the internal representation that the child has formed of the mother. This Internalization is what provides the child with an image that helps supply them with an unconscious level of guiding support and comfort from their mothers. Deficiencies in positive Internalization could possibly lead to a sense of insecurity and low self esteem issues in adulthood.
