Children's Counting and Concepts of Number Karen C. Fuson,2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books to be devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Volumes in the Progress sequence are strongly thematic in that each is limited to some well defined domain of cognitive developmental research e g logical and mathematical development semantic development All Progress volumes are edited collections Editors of such books upon consultation with the Series Editor may elect to have their works published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors will be published as separate volumes within the series is being used in the selec A fairly broad definition of cognitive development tion of books for this series

Reformulation and Acquisition of Linguistic Complexity Claire Martinot,Tomislava Bošnjak Botica,Sonia Gerolimich,Urszula Paprocka-Piotrowska,2019-03-07 Reformulation and Acquisition of Linguistic Complexity proposes a new answer to the question of the appropriation or acquisition of a mother tongue a complex object one that is both stable and perpetually evolving This answer is based on the reformulating principle that children spontaneously apply a principle that is illustrated here with children retelling the same story These children are all 6 8 or 10 years old and speak French Italian Croatian or Polish as a first language This book demonstrates that the acquisition of any mother tongue is explained by the application of various reformulation procedures between source predications and

reformulated predications These procedures are comparable from one language to another and different from one age group to another This book also studies certain complex phenomena at the lexical and syntactical levels and analyzes how children depending on their age treat these phenomena Finally we show that the acquisition of a mother tongue is a fundamentally linguistic activity
