This island of preservation became the port of call for a new generation of mountain explorers heading towards the vast alpine wilderness to the east. Sequoia and Kings Canyon National Parks John Roberts White, Samuel J. Pusateri, 1949 Sequoia and Kings Canyon National Parks lie across the heart of the lofty Sierra Nevada in East Central California. They cover 1,309 square miles, 840,000 acres of spectacular granite mountains, deep canyons and magnificent forests. Both parks have big trees, vast mountainous primitive areas, deep canyons, polished granite domes, jeweled lakes and tumbling waterfalls

By 1890 however a public park system was firmly established in California when the Yosemite high country and much of what is now Sequoia and King's Canyon National Parks were set aside as federally protected public preserves. This collection of essays and photographs originally published as a special issue of California History documents the creation and management of California's first three national parks. As the essays remind us the issues of park development so hotly debated today were raised first in Yosemite nearly a century ago. Yosemite's significance in landscape art, its role in the development of western tourism and its promotion as one of the great icons of American culture are among the other major themes discussed here.
