Andersen, 2016-07-31 The numerous cat breeds are both varied and mysterious. Most have tails, some do not. Some have curled ears, some have huge ears. Some have long hair, some have short, and some have no hair at all. Some have hair, but it's really no more than a little peach fuzz. But there are more than just physical differences between the breeds. Their personalities are just as vibrant, and each breed is not quite like the others. Some are chatty and friendly, others are aloof and circumspect. Some spend their days climbing door frames, others would rather lie about in the sun. These differences are fascinating to behold and helpful to all those interested in sharing their home with a cat. Found here are more than sixty of the most common breeds and hybrids from around the world. *Animals of the Serengeti* Adam Scott Kennedy, Vicki Louise Kennedy, 2014-03-02 Containing 146 color photos, this book looks at the mammals and reptiles most likely to be encountered in the world-famous Serengeti National Park and Ngorongoro Crater. It includes 89 species of mammal and reptile.

Tanzania Safari Guide Philip Briggs, Chris McIntyre, 2023-05-05 This new thoroughly updated ninth edition of Bradt's Tanzania Safari Guide remains the only practical guidebook to the country that reflects tourism's shift away from backpackers and budget camping safaris to upper end and mid range safaris and beach holidays Unlike other guidebooks the main focus is practical information about Tanzania's peerless collection of national parks game reserves and other safari destinations including the Serengeti Ngorongoro Crater Tarangire Ruaha Katavi Gombe Stream Mahale Mountains and four new national parks designated in 2019 including Nyerere which encompasses much of the former Selous Game Reserve and is thought Africa's largest National Park Every major reserve is given a dedicated chapter detailing its ecology wildlife accommodation options game drives and other activities Written by acknowledged Africa experts and prolific guidebook writers Philip Briggs and Chris McIntyre Bradt's Tanzania Safari Guide also focuses on other popular and off the beaten track tourist attractions including Mount Kilimanjaro the Spice Island of Zanzibar and the mysterious Kilwa Ruins and Kondoa Rock Art UNESCO World Heritage Sites often relegated to the small print of other guides Accommodation listings for the safari destinations are the most detailed and authoritative available the authors weeding through the ever growing number of lodges and camps to create a critically selective list of the best properties in every price bracket upmarket mid range and budget Meanwhile a 48 page wildlife colour field guide details all species a visitor can expect to find on a safari Since the mid 1980s when only basic camping safaris were feasible

Tanzania has grown to be one of Africa's top safari destinations. This new edition actively responds to this evolution by focusing on the country mainly as a safari and short stay fly in holiday destination. It also reflects the growing trend away from large lodges towards small exclusive eco friendly camps in remote parts of national parks and bordering community concessions. Beyond spectacular year round game viewing, Tanzania is one of Africa's most varied countries, its long palm fringed coastline offering post safari relaxation and complemented by the Great Rift Valley portions of Africa's three largest lakes and impressive mountains. Use this guide to discover everything Tanzania has to offer.

Emerging Zoonotic and Wildlife Pathogens Dan Salkeld, Skylar Hopkins, David Hayman, 2024-01-21. This accessible book describes a fascinating range of emerging infectious disease outbreaks affecting humans including rabies, Ebola virus, Lyme disease, bubonic plague, and of course Covid 19. The book also covers emerging infectious diseases in wildlife such as Tasmanian devil facial tumour disease, white nose syndrome, mange, and musk ox lungworm. These case studies span the entire range of zoonotic disease emergence pathways from sheep testicles in Wyoming, USA to butchered bush rats in Vietnam. Transmission dynamics are examined from diverse perspectives from global drivers of pathogen emergence including globalization, land use patterns, and changing climates to outbreak epidemiology, epidemic curves, and disease spillover to conservation and control interventions. Despite a recent explosion of courses on the topic and a viral pandemic that has affected the entire world, this is the first textbook to focus on pathogen spillover ecology at the human wildlife interface. *Emerging Zoonotic and Wildlife Pathogens* serves as an introduction to this multidisciplinary field for upper level undergraduate students and graduate students interested in disease ecology, veterinary epidemiology, public health, and conservation. It will also be relevant to a broader interdisciplinary audience of conservation biologists and public health specialists and even the interested public.

Parasites in Ecological Communities Melanie J. Hatcher, Alison M. Dunn, 2011-06-16. Interactions between competitors, predators, and their prey have traditionally been viewed as the foundation of community structure. Parasites, long ignored in community ecology, are now recognized as playing an important part in influencing species interactions and consequently affecting ecosystem function. Parasitism can interact with other ecological drivers, resulting in both detrimental and beneficial effects on biodiversity and ecosystem health. Species interactions involving parasites are also key to understanding many biological invasions and emerging infectious diseases. This book bridges the gap between community ecology and epidemiology to create a wide ranging examination of how parasites and pathogens affect all aspects of ecological communities, enabling the new generation of ecologists to include parasites as a key consideration in their studies. This comprehensive guide to a newly emerging field is of relevance to academics, practitioners, and graduates in biodiversity, conservation, and population management, and animal and human health.
