An,2015-10-27 Benjamin An has discovered the human hand structure which explains why humans are born to hit with an implement and to throw with a trajectory release Hitting and throwing became the most powerful actions in the animal kingdom These actions became the primary tools for humans to survive historically Survival skills become sports actions in the modern civilized world Different sports were invented with modification of the sports actions Dr An has looked into these actions seriously in terms of human natureintellectually biomechanically psychologically physically and mentallyin order to help athletes perform these actions without confusion Many performance problems occur just because these actions are parts of human nature and humans know too much about these actions For example for every action a human knows the results of this action It is very hard for a human to

concentrate on the actions only and ignore the results of these actions Thinking about the results has become one of the most serious interferences of that action itself Dr An calls these intellectual interferences Human physical actions are complicated by human mental thoughts and intellectual understandings Sports actions are not just physical actions Sports actions have to be modified if it is necessary and executed with specific mental thoughts in order to fit in any specific sport The author has specifically emphasized on these points in his book **30-Love - The Story of a Young Tennis Player** Gus

TEACHING TENNIS IN FRANCE: Nicolas Stanajic Petrovic, 2025-02-06 I decided to write this book during the Covid pandemic a period during which teaching tennis was made impossible due to severe restrictions especially in Hong Kong China where I have lived for 13 years The book was first published in French during French Open 2023 a year celebrating the 40th anniversary of our last Grand Slam Champion Yannick Noah On June 5th 1983 Yannick beat Swedish player and defending champion Mats Wilander while I was celebrating my 12th birthday An amazing gift for me who had started tennis one year earlier I have interviewed more than 100 former players coaches tennis consultants agents and journalists and I have analyzed the French Tennis Federation and the national press archives Both my knowledge in history bachelor from La Sorbonne University in 1993 and my passion for tennis which I started teaching in 1991 enabled me to understand and explain the evolution of teaching methods in France but not only Tennis was first born in Europe and later spread in America and the rest of the world Spending 6 summers in Florida at IMG Bollettieri 2004 2009 considered in the 90 s as the Mecca of tennis made me discover a different approach when it comes to coaching while Frenchies seemed mostly focused on both the technical and the tactical aspects of the game I noticed that training sessions in the US focused more on the physical and mental ones Being a former coach trainer for the French Tennis Federation and a professional coach for the last 22 years 9 years in France 13 years in Hong Kong China enabled me to connect with professionals from all over the globe Many of them seemed very interested in the French teaching method which is why I have decided to write this book in the first place
