Francis,William Gibson,2012-10-04 The period 1689 1901 was the golden age of the sermon in Britain It was the best selling printed work and dominated the print trade until the mid nineteenth century Sermons were highly influential in religious and spiritual matters but they also played important roles in elections and politics science and ideas and campaigns for reform Sermons touched the lives of ordinary people and formed a dominant part of their lives Preachers attracted huge crowds and the popular demand for sermons was never higher Sermons were also taken by missionaries and clergy across the British empire so that preaching was integral to the process of imperialism and shaped the emerging colonies and dominions The form that sermons took varied widely and this enabled preaching to be adopted and shaped by every denomination so that in this period most religious groups could lay claim to a sermon style The pulpit naturally lent itself to controversy and consequently sermons lay at the heart of numerous religious arguments Drawing on the latest research by leading sermon scholars this handbook accesses historical theological rhetorical literary and linguistic studies to demonstrate the interdisciplinary strength of the field of sermon studies and to show the centrality of sermons to religious life in this period *Handbook of Medieval Studies* Albrecht Classen,2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field The

The New England Soul Harry S. Stout, 2012-01-05 Harry Stout's groundbreaking study of preaching in colonial New England changed the field when it first appeared in 1986 Here twenty five years later is a reissue of Stout's book a reconstruction of the full import of the colonial sermon as a multi faceted institution that served both religious and political purposes and explained history and society to the New England Puritans for one and a half centuries

Propaganda and (un)covered identities in treatises and sermons: Christians, Jews,

and Muslims in the premodern Mediterranean Ferrero Hernández, Cándida, G. Jones, Linda, 2020-05-21 The eleven essays included in this collective volume examine a range of textual genres produced by Christians and Muslims throughout the Mediterranean including materials from the Corpus Islamlatinum Christian propaganda and polemical works targeting Muslims and Jews Inquisition records and Christian and Muslim sermons Despite the diversity of the works under consideration and the variety of methodological and disciplinary approaches employed in their analysis the volume is bound together by the common goals of exploring the propaganda strategies premodern authors deployed for specific aims be it the unification of religious cultural and political groups through discourses of self representation or the invention of the political cultural religious or gendered other Many of the essays offer critical re readings of works that are obscure or have never been studied while others shed new light on the cultural and textual interactions between Christians Muslims and Jews The volume is divided into four sections the first of which is comprised of three chapters on the Corpus Islamlatinum that furnish new evidence showing the important role this encyclopedia played in spreading knowledge about Islam and contributing to the creation of propaganda and polemics against Islam among European intellectual circles The chapters in section two offer novel interpretations of the hermeneutical strategies underlying the composition of polemical works such as the lives of Muhammad and Pedro de la Cavalleria s Zelus Christi The essays in section three identify some common hermeneutical strategies in the use of anti Jewish and anti Islamic arguments to polemicize against religious others or edify Christians and illuminate intertextual relations between authors and genres disputatio and praedicatio Finally section four introduces the gender perspective the genered nature of the accusations of Judaizing in the analysis of the transcripts of the inquisitorial court of three sisters who were tried in Barcelona in 1496 on the one hand and two studies that explore the constructions of identities and gender relations reflected in various Islamic sources from opposite ends of the Mediterranean They offer glimpses of women as subject s and as object s of preaching and show how such texts can reify or subvert traditional binary gender roles

Thompson, 2018-05-24 The five volume Oxford History of Dissenting Protestant Traditions series is governed by a motif of migration out of England It first traces organized church traditions that arose in England as Dissenters distanced themselves from a state church defined by diocesan episcopacy the Book of Common Prayer the Thirty Nine Articles and royal supremacy but then follows those traditions as they spread beyond England and also traces newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent Secondly it does the same for the doctrines church practices stances toward state and society attitudes toward Scripture and characteristic patterns of organization that also originated in earlier English Dissent but that have often defined a trajectory of influence independent ecclesiastical organizations The Oxford History of Protestant Dissenting Traditions Volume II charts the development of protestant Dissent between the passing of the Toleration Act 1689 and the repealing of the Test and Corporation Acts 1828 The long eighteenth century was a period in which Dissenters slowly moved from a position of being a persecuted minority to achieving a degree of acceptance and eventually full political rights The first part of the volume considers the history of various dissenting traditions inside England There are separate chapters devoted to Presbyterians Congregationalists Baptists and Quakers the denominations that traced their history before this period and also to Methodists who emerged as one of the denominations

of New Dissent during the eighteenth century The second part explores that ways in which these traditions developed outside England It considers the complexities of being a Dissenter in Wales and Ireland where the state church was Episcopalian as well as in Scotland where it was Presbyterian It also looks at the development of Dissent across the Atlantic where the relationship between church and state was rather looser Part three is devoted to revivalist movements and their impact with a particular emphasis on the importance of missionary societies for spreading protestant Christianity from the late eighteenth century onwards The fourth part looks at Dissenters relationship to the British state and their involvement in the campaigns to abolish the slave trade The final part discusses how Dissenters lived the theology they developed and their attitudes towards scripture the importance of both sermons and singing their involvement in education and print culture and the ways in which they expressed their faith materially through their buildings
