Antiquities Terry A. Barnhart, 2015-11 Writing the history of American archaeology especially concerning eighteenth and nineteenth century arguments is not always as straightforward or simple as it might seem Archaeology's trajectory from an avocation to a semi profession to a specialized self conscious profession was anything but a linear progression The development of American archaeology was an organic and untidy process which emerged from the intellectual tradition of antiquarianism and closely allied itself with the natural sciences throughout the nineteenth century especially geology and the debate about the origins and identity of indigenous mound building cultures of the eastern United States Terry A Barnhart examines how American archaeology developed within an eclectic set of interests and equally varied settings He

argues that fundamental problems are deeply embedded in secondary literature relating to the nineteenth century debate about Mound Builders and American Indians Some issues are perceptual others contextual and still others basic errors of fact Adding to the problem are semantic and contextual considerations arising from the accommodating indiscriminate and problematic use of the term race as a synonym for tribe nation and race proper a concept and construct that does not in all instances translate into current understandings and usages American Antiquities uses this early discourse on the mounds to frame perennial anthropological problems relating to human origins and antiquity in North America *Peru* William Golden Mortimer,1901 **Coffee: from Plantation to Cup** Francis Beatty Thurber,1901 *Peru.
