Long Road To Nowhere:

The Long Road to Nowhere Mark Jones, 2009-05 One day while sitting on a park bench Mark was asked by an old man Why do you do what you do Why do you work where you work or live where you live Whether we agree or not life really is about a series of paths and decisions whereby even one small change can alter our lives forever We usually want to blame others including God for our decisions Only by examining the paths we have taken can we really see where we are at It is only when we look deep within ourselves we discover that as writers singers musicians interior decorators or even truck drivers we all have gifts Having them is not to question rather it is WHAT WE DO WITH THEM that really matters Wherever your passions lie you can erase your doubts and restore your joy Just imagine yourself on a park bench

Moths to the Flame Gregory J. E. Rawlins,1996 For two decades now I've been awaiting a book explaining computers and their social consequences to literate readers without using any unnecessary jargon or pedantry or math I wanted such a book to lend to all those friends who've pestered me about computers and to all the computer science students who've asked me about computers over the years I particularly wanted a book that I could buy for my father who's an accountant of the old school to explain something of the mysterious world I live in Gregory Rawlins who teaches artificial intelligence at Indiana University got tired of waiting for that book and decided to write it himself In Moths to the Flame he takes us on a humorous yet thought provoking tour of the world wrought by modern technology a technology he points out that is rooted deep inside the military a technology that when applied to everyday life may have startling results Unlike space technology today's technological race won't simply bring us Tang flavored Velcro Rawlins educates by entertaining His stories and anecdotes enliven and surprise us while increasing our awareness of technology itself as a player in the political and commercial climate of our times In our headlong rush toward networked humanity Rawlins raises serious concerns about our future jobs and our future wars we can figure out what kind of job to get today if we know where technology is taking us tomorrow The book's first four chapters explore the worlds of privacy virtual reality publishing and computer networks while the last four focus on social issues such as warfare jobs computer catastrophes and the future itself Throughout unusual eye opening analogies and historical comparisons from Egyptian hieroglyphics to the sewing machine to the codebreakers of
