circumstances including income health physical appearance and marital status only account for about 10 percent of a person's overall life satisfaction From there he offers alternatives to the frequent methods we use to make ourselves happy Instead of aiming to make more money Thielen contends that expressing gratitude and cultivating optimism are surer paths to joy Rather than focusing on constant advancement in our careers let's practice our ability to forgive to be generous and to use trials as growth opportunities These lessons and much more help readers who may be dissatisfied in their lives see that authentic contentment is closer than they ever imagined The book features a guide for group or individual study which includes questions for reflection and a challenge for each individual to reflect on during the week *The Saturday Evening Post* ,1916
