[Utopias and Architecture](#) Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper-modern stance and orthodox modernist architecture

Louis H. Sullivan and a 19th-Century Poetics of Naturalized Architecture Lauren S. Weingarden, 2017-07-05 For most of the twentieth century modernist viewers dismissed the architectural ornament of Louis H Sullivan 1856 1924 and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism In this study Lauren Weingarden reveals Sullivan's eloquent articulation of nineteenth century romantic practices literary linguistic aesthetic spiritual and nationalistic and

thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth century modernism Using three interpretive models discourse theory poststructural semiotic analysis and a pragmatic concept of sign functions she restores the integrity of Sullivan s artistic choices and his historical position as a culminating figure within nineteenth century romanticism By giving equal weight to Louis Sullivan s writings and designs Weingarten shows how he translated both Ruskin s tenets of Gothic naturalism and Whitman s poetry of the American landscape into elemental structural forms and organic ornamentation Viewed as a site where various romantic discourses converged Sullivan s oeuvre demands a cross disciplinary exploration of each discursive practice and its rules of accumulation exclusion reactivation The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art which he considered co equal with the spiritual and didactic functions of landscape poetry

Architecture, Aesthetics, and the Predicaments of Theory Amir H Ameri, 2021-12-23 Architecture Aesthetics and the Predicaments of Theory offers a critical analysis of the methodological constants and shared critical strategies in the history of theoretical discourse on Western architecture. Central to these constants is the persistent role of aesthetics as a critical tool for the delimitation of architecture. This book analyzes the unceasing critical role aesthetics is given to play in the discourse of architecture. The book offers a close and critical reading of three seminal texts from three different periods in the history of theoretical discourse on Western architecture: the Renaissance, the Enlightenment, and 19th century Romanticism. The first text is Leone Battista Alberti's Ten Books on Architecture of 1452, the next Marc Antoine Laugier's An Essay on Architecture of 1753, and last John Ruskin's The Seven Lamps of Architecture of 1849. Additional influential texts from among others the 20th and 21st centuries are engaged with along the way to locate and contextualize the arguments within the broader discursive tradition of Western architecture. The book will interest scholars and students of architecture, architectural history and theory as well as scholars and students of cultural studies, aesthetic philosophy, art history, literary criticism and related disciplines.

In Pursuit of Beauty Metropolitan Museum of Art (New York, N.Y.), 1986. This project is the first comprehensive study of a phenomenon that not only dominated the American arts of the 1870s and 1880s but also helped set the course of such later developments in the United States as the Arts and Crafts movement, the indigenous interpretation of Art Nouveau, and even the rise of modernism. In fact, the early history of the Metropolitan, its founding, its sponsorship of a school of industrial design, and its display of decorative works is inextricably tied to the Aesthetic movement and its educational goals. *In Pursuit of Beauty: Americans and the Aesthetic Movement* comprised some 175 objects including furniture, metalwork, stained glass, ceramics, textiles, wallpaper, painting, and sculpture. Some of these had rarely been displayed; others, although familiar, were being shown in new and even startling contexts. The exhibition and catalogue are arranged thematically to illustrate both the major styles of a visually rich movement and the ideas that generated its diversity.

From publisher's description

Hagia Sophia, 1850-1950 Robert S. Nelson, 2004-07-14 Hagia Sophia, the Church of Holy Wisdom, sits majestically atop the plateau that commands the straits separating Europe and Asia. Located near the acropolis of the ancient city of Byzantium, this unparalleled structure has enjoyed an extensive and colorful history as it has successively been transformed into a cathedral, mosque, monument, and museum. In *Hagia Sophia, 1850-1950*, Robert S. Nelson explores its many lives. Built from 532 to 537 as the Cathedral of Constantinople, Hagia Sophia was little studied and seldom

recognized as a great monument of world art until the nineteenth century and Nelson examines the causes and consequences of the building's newly elevated status during that time. He chronicles the grand dome's modern history through a vibrant cast of characters: emperors, sultans, critics, poets, archaeologists, architects, philanthropists, and religious congregations, some of whom spent years studying it, others never visiting the building. But as Nelson shows, they all had a hand in the recreation of Hagia Sophia as a modern architectural icon. By many means and for its own purposes, the West has conceptually transformed Hagia Sophia into the international symbol that it is today. While other books have covered the architectural history of the structure, this is the first study to address its status as a modern monument. With his narrative of the building's rebirth, Nelson captures its importance for the diverse communities that shape and find meaning in Hagia Sophia. His book will resonate with cultural, architectural, and art historians as well as with those seeking to acquaint themselves with the modern life of an inspired and inspiring building.
