Seeing Our Planet Whole: A Cultural and Ethical View of Earth Observation Harry Eyres, 2016-09-22 This book shows how our new found ability to observe the Earth from the necessary distance has wide and profound cultural and ethical implications First of all it is the outcome of speculations and investigations of human beings in relation to their home planet carried out over millennia In particular it reveals a split between the ancient idea of the Earth as nurturing mother and the more recent conception of the Earth as a neutral resource able to be infinitely exploited by humankind The 1968 Earthrise photograph showing the beauty and fragility of the Earth helped spark a worldwide environmental movement now the comprehensive coverage of global change provided by satellites has the potential to convince us beyond reasonable doubt of the huge alterations being wrought upon the Earth and its climate system as a result of human actions and of the need to act more responsibly

Seeing Earth from Space Patricia Lauber, 1990 Text and photographs taken from space depict the nature evolution and future of Earth

The new look at the Earth's climate mechanism Bogdan Góralski, 2019-07-27 Is the Earth's climate getting warmer My research shows that indeed the atmosphere and hydrosphere of the northern hemisphere warmed up during XIX XXI centuries but the southern hemisphere getting colder However this warming of the northern hemisphere is not caused by excessive carbon dioxide emission caused by the developing human civilization but is caused by the gravitational magnetic influences of the Solar System on the rotating Earth as a result of which the outer layer of the Earth's rotates Being in the move the Earth's coating changes its position relative to the ecliptic plane and along with its movement over surface of the Earth's is the shift of the zones of life giving rainfalls that are stable relative to ecliptic plane This results in a global economic and social events in the form of regional crises in areas affected by the drought or excessive precipitation Physical

phenomena related to the movement of the Earth's coating and evidence of the occurrence of this phenomenon are presented in the following work My theory about the movement of the earth's coating is confirmed by the book of Charles Hapgood 1957 entitled Earth's Shifting Crust to which the foreword was written by Albert Einstein link https://archive.org/stream/eathsshiftingcru033562mbp/eathsshiftingcru033562mbp_djvu.txt Jakuszowice 27 July 2019 15:10 Bogdan G ralski
