Looking At Life Differently Minimising Tensions Maximising Effectiveness:

Defence Management, 2003 Generational Tensions and Solidarity Within Advanced Welfare States Asgeir

Falch-Eriksen, Marianne Takle, Britt Slagsvold, 2021-09-12 This book explores generation as both a reference to family or kinship structures and a reference to cohorts or age sets. The principal objective is branching out this two part concept through studies of tensions and solidarity within and between generations of advanced and robust welfare states. Answering key questions using multiple disciplinary approaches, the book considers how generations challenge advanced and robust welfare states, how new and young generations are affected by living in an advanced welfare state with older generations, how tensions or solidarity are understood when facing challenges, and what the key characteristics are of certain generation types. It contributes to the development of a more comprehensive generation approach within social sciences by developing the concept of generation by exploring different challenges to the welfare state such as migration, digitalization,

environmental damages, demands for sustainability and marginalization. Highlighting the escalating tensions and altered versions of solidarity between generations, this book shows how a comprehensive concept of a generation can create new insights into how we collectively coordinate and resolve challenges through the welfare state. It will be of interest to all scholars and students of social policy, sociology, political science, and social anthropology. *Wholesome Leadership: Being authentic in self, school and system* Tom Rees, 2018-05-28 Spanning the comprehensive perspective of self, school, and system, this tour de force is both well informed and uplifting whilst at the same time being full of practical advice and guidance rooted in the author's front line role leading a school. Tom Rees's depth of thinking and knowledge of leadership and his ability to translate that into both a structure and tone that will be relevant to leaders in schools today will resonate with leaders at all levels. The book is brilliantly supplemented with the thoughts and views of colleagues spanning the whole educational spectrum, including Sir David Carter, Clare Sealy, Daisy Christodoulou, MAT CEOs, Julia Kedwards, Stephen Tierney, and Andrew Morrish, plus his very own actual dad. The impact and effectiveness of ministerial reshuffles Great Britain:

Parliament: House of Commons: Political and Constitutional Reform Committee, 2013-06-14 Reshuffles are damaging to the effectiveness of individual Ministers and of Government as a whole. They also hinder Parliament's ability to hold Government to account. Every time there is a reshuffle, it is preceded by months of speculation about who will move where, which in itself causes a kind of paralysis within Government. The Committee calls for Secretaries of State to be left in post for the length of a Parliament. Taken together with the advent of fixed term Parliaments, this should enable them to make a real difference. Some reshuffling of ministers is inevitable because of resignations and illness, but reshuffles have become a habit in the UK. The majority of the Committee concluded that there should be a specific Minister in the Cabinet Office who is responsible for ministerial development. He or she should oversee ministerial training and appraisal. There should also be compulsory training for all new Ministers, continuous professional development for experienced Ministers, and basic ministerial training

for shadow Ministers in the 12 months before the expected date of a general election Outgoing Ministers should handover directly to their successors rather than relying exclusively on the civil service to conduct handovers

Conflict and Governance Susan Brown,2005 The Authors interrogate the manner in which South Africa's changing economy is re-shaping the political and the social landscape Based on in depth analysis of the data suggestions are made for future policy development

central focus is the aspects of organisational aesthetics of the activities of street performers and street festival organisers. The dynamics of street performances are structured and emerge as a type of alternative organisation. The book aims at throwing light on these processes from the point of view of humanistic management, which is a relatively new topic in organisational studies and overlooked in other academic fields. The book also identifies and outlines some research implications for the combined area of humanistic management and arts management. It offers a model of the management of street performance embedded in a theoretical context of 1 humanistic management, 2 arts management and 3 organisation informed by values such as community and social entrepreneurship. Ultimately, the organisation of art in the urban sphere can gain from lessons from the alternative organisational practices depicted in this book, which in turn can inform broader humanistically oriented managerial visions.
