across four centuries When plague appeared in the Mediterranean region in 1348 physicians believed the epidemic's timing and spread could be explained logically and the disease could be successfully treated This confidence resulted in the widespread and long term circulation of plague tracts which described the causes and signs of the disease offered advice for preventing infection and recommended therapies in a largely consistent style What where and especially who was blamed for plague outbreaks changed considerably however as political religious economic intellectual medical and even publication circumstances evolved Patterns of Plague sheds light on what was consistent about plague thinking and what was idiosyncratic to particular places and times revealing the many factors that influence how people understand and respond to epidemic disease *The Constitutions and Finance of English, Scottish and Irish Joint-stock Companies to 1720* ,

England and Wales, Or, Delineations, Topographical, Historical, and Descriptive, of Each County John Britton, Edward Wedlake Brayley, Joseph Nightingale, James Norris Brewer, John Evans, John Hodgson, Francis Charles Laird, Frederic Shoberl, John Bigland, Thomas Rees, 1810 **The Printed Image in Early Modern London** Joseph Monteyne, 2017-07-05

Presenting an inventive body of research that explores the connections between urban movements space and visual representation this study offers the first sustained analysis of the vital interrelationship between printed images and urban life in early modern London The study differs from all other books on early modern British print culture in that it seeks out printed forms that were active in shaping and negotiating the urban milieu prints that troubled categories of high and low

culture images that emerged when the political became infused with the creative as well as prints that bear traces of the roles they performed and the ways they were used in the city It is distinguished by its close and sustained readings of individual prints from the likes of such artists as Wenceslaus Hollar Francis Barlow and William Faithorne and this visual analysis is complemented with a thorough examination of the dynamics of print production as a commercial exchange that takes place within a wider set of exchanges of goods people ideas and money across the city and the nation This study challenges scholars to re imagine the function of popular prints as a highly responsive form of cultural production capable not only of recording events spaces and social actions but profoundly shaping the way these entities are conceived in the moment and also recast within cultural memory It offers historians of print culture and British art a sophisticated and innovative model of how to mobilize rigorous archival research in the service of a thoroughly historicized and theorized analysis of visual representation and its relationship to space and social identity
