Basilio Gaztambide,2025-06-13 This book sheds light on an as yet unstudied aspect of The Museum of Modern Art s MoMA preeminent role in establishing the definition of the problematic term Latin American art in the United States from the 1930s to the present through its collection displays In examining the shifting categorization of Latin American works according to stylistic and geographic taxonomies we gain a greater understanding of the organization of the Museum s collections as a whole during the 1940s and 1950s This book is the first to document these institutional precedents crucial for the understanding of the articulation of a Modernist canon and its contested legacy today The MoMA is widely recognized as the preeminent institution that defined 20th century art through its collection shaping our understandings of the history of art with its hierarchies and exclusions as they sediment over time MoMA s holdings of art from Latin America shed light on a key period when the stylistic categories that have since come to be accepted by many today as the Modernist

canon developed MoMA's collection displays suggest ways in which artists from areas of the world formerly excluded can be incorporated within today's increasingly global museums MoMA's approach may be compared to initiatives adopted by several museums since the 2000s creating geographically defined curatorial positions as a way to redress gaps in collecting art from Latin America and other areas of the world In this book author Miriam M Basilio Gaztambide offers a closer study of the history of collection displays as a means to understand canon formation in modern art museums This work will be of interest to those researching Latin American American modern and contemporary art and curatorial and museum studies

In the Embrace of the Swan Rüdiger Görner, Angus Nicholls, 2010-08-31 Myths determine the way cultures understand themselves The papers in this volume examine culturally specific myths in Britain and the German speaking world and compare approaches to the theory of myth together with the ways in which mythological formations operate in literature aesthetics and politics with a focus on the period around 1800 They enquire into the consequences of myth oriented discourses for the way in which these two cultures understand each other and in this way make a significant contribution to a more profound approach to intercultural research

Photography and Doubt Sabine T. Kriebel, Andrés Mario Zervigón, 2016-11-25 Recent decades have seen photography's privileged relationship to the real come under question Spurred by the postmodern critique of photography in the 1980s and the rise of digital technologies soon thereafter scholars have been asking who and what built this understanding of the medium in the first place Photography and Doubt reflects on this interest in photography's referential power by discussing it in rigorously historical terms How was the understanding of photographic realism cultivated in the first place What do cases of staged and manipulated photography reveal about that realism's hold on audiences across the medium's history Have doubts about photography's testimonial power stimulated as much knowledge as its realism Edited by Sabine T Kriebel and Andrés Mario Zervigón Photography and Doubt is the first multi authored collection specifically designed to explore these questions Its 13 original essays illustrated with 73 color images explore cases when the link between the photographic image and its referent was placed under stress and when photography was as attuned to its myth making capabilities as to its claims to authenticity Photography and Doubt will serve as a valuable resource for students and scholars in art history visual and media studies philosophy and the history of science and technology
