Mobilizing Citizens for Better Schools Robert F. Sexton, 2004-03-20 Tired of the complacent attitudes Kentucky politicians showed toward education the Prichard Committee formed as an organization to galvanize the citizens of Kentucky to attack the state's historic educational deficits The committee's campaigning helped prepare the way for the passage of the Kentucky Education Reform Act in 1990 and continues to work for school reform today Based on his wealth of experience and success with the Prichard Committee for Academic Excellence Sexton provides invaluable guidance for citizens of all states who are interested in implementing school reform

Mobilizing Interest Groups in America Jack L. Walker, 1991 Describes the development of interest groups in the USA mainly from the 1960s to the 1990s Using the results of two national surveys of all membership associations operating in Washington in 1980 and 1985 examines the ways in which different types of social groups develop the organizational structures necessary to represent themselves Describes methods for financing these groups and investigates the strategies they use to influence American politics including litigation strategies Considers occupationally based groups in the profit sector and in the nonprofit sector and citizens groups which are open to all Examines the extent of influence of different groups

Mobilizing for Democracy Vera Schatten Coelho, Bettina von Liers, 2013-04-04 Mobilizing for Democracy is an in depth study into how ordinary citizens and their organizations mobilize to deepen democracy Featuring a collection of new empirical case studies from Angola Bangladesh Brazil India Kenya Nigeria and South Africa this important new book illustrates how forms of political mobilization such as protests social participation activism litigation and lobbying engage with the formal institutions of representative democracy in ways that are core to the development of democratic politics No other volume has brought together examples from such a broad Southern spectrum and covering such a diversity of actors rural and urban dwellers transnational activists religious groups politicians and social leaders The cases illuminate the crucial contribution that citizen mobilization makes to democratization and the building of state institutions and reflect the uneasy relationship between citizens and the institutions that are designed to foster their political participation

Outside Lobbying Kenneth Kollman, 2020-11-10 In *Outside Lobbying* Ken Kollman explores why and when interest group leaders in Washington seek to mobilize the public in order to influence policy decisions in Congress In the past political scientists have argued that lobbying groups make outside appeals primarily because of their own internal dynamics to recruit new members for example Kollman however grants a more important role to the need for interest group leaders to demonstrate popular support on particular issues He interviewed more than ninety interest group leaders and policy makers active on issues ranging from NAFTA to housing for the poor While he concludes that group leaders most often appeal to the public when they perceive that their stand has widespread popular support he also shows that there are many important and revealing exceptions to this pattern Kollman develops his theory of outside lobbying through a combination of rational choice modeling and statistical tests that compare public

opinion data with data from his interviews about interest groups policy positions and activities The tests reveal that group leaders use outside lobbying to take advantage of pre existing public preferences not to recruit members or to try to generate the mere appearance of grass roots support Kollman s innovative book will clarify the complex relationship among lobbying public opinion and public policy and will set a new standard for interest group research *Climate Change Communication and the Internet* Nelya Koteyko,Brigitte Nerlich,Iina Hellsten,2019-05-16 The volume provides a timely state of the art collection of studies examining climate change communication in the era of digital media The chapters focus on a broad range of topics covering various aspects of both practice and research in climate change communication ranging from the use of online platforms to blogs and social networking sites Climate change communication has increasingly moved into Internet based forums and this volume provides a comprehensive overview of research into Internet and climate change communication The studies share valuable methodological insights in this relatively new field of research and shed light on the opportunities and challenges underlying the collection and analysis of online climate change related data This book was previously published as a special issue of Environmental Communication *Networks and Mobilization Processes: The Case of the Japanese Anti-Nuclear Movement after Fukushima* Anna Wiemann,2018-05-14 Environmental disasters or other large scale disruptive events often trigger the emergence of social movements demanding social and or political change This study investigates mobilization processes at the meso level of the Japanese anti nuclear movement after the nuclear disaster at the Fukushima Daiichi nuclear power plant caused by the Great East Japan Earthquake and subsequent tsunami waves on March 11 2011 To capture such meso level movement dynamics which so far have played only a minor role in research on social movement mobilization the study presents an analytical model based on premises from political process theory network theory and relational sociology This model is then applied to the case of the Japanese anti nuclear movement after Fukushima by looking at the relational dynamics of two coalitional movement networks engaged in advocacy related activities in T ky The first case study is e shift a network coalition working for nuclear phase out and the promotion of renewable energy the other is SHSK Shienh Shimin Kaigi a coalition pushing for the rights of people affected by radioactive contamination and or evacuation from contaminated areas The study traces the mobilization processes of these two networks by analyzing data gathered in 2013 and 2014 in the form of participant observation of movement events semi structured interviews with movement organization representatives and documentary data *Citizen Lobbyists* Brian E. Adams,2007 How do ordinary citizens become involved in local politics **Horribly Dormant** Pasquale De Marco,2025-03-18 In the aftermath of the earth shattering events of September 11 2001 a lingering question has haunted the minds of many what role if any did Israel play in this tragedy This book delves into this complex and controversial topic meticulously examining evidence witness accounts and expert analysis to shed light on the shadows cast by that fateful day Our journey takes us through a labyrinthine landscape of espionage deception and geopolitical intrigue where intelligence agencies and political actors

Two-Track Democracy in South Korea Seongyi Yun,2023-03-02 This book examines three ironic phenomena of South Korean democracy that have developed after its democratic transition in 1987 While the evaluation of South Korea s political system by external institutions has steadily improved people s trust in the nation s political system continues to decline However in the face of political distrust unlike in Western democracies voter turnout has increased Even though political participation and the political influence of citizens have been strengthened over time the political influence of civic organizations that fostered the initial democratization movement in the 1980s has weakened parallel to the decline in citizens confidence in these organizations Why is South Korean democracy witnessing ironic phenomena that cannot be succinctly explained by existing theories of political development or democracy This book seeks these answers within the framework of a twotrack democracy that is the interplay between institutional and contentious politics A model of democracy that combines contentious politics with formal politics can shed light on this phenomenon Yun proposed that the traditional hierarchical and elite centered political system is no longer sustainable In order to resolve the democratic deficiency perceived by citizens it is necessary to consider a new model of democracy beyond the improvement of representative democracy Moreover the new model of democracy should be based on a fusion of institutional politics and contentious politics The book will appeal to scholars and students interested in the politics of South Korea democratization and democracy more generally *Creating Public Value* Mark H.

Moore,1997-03-25 Moore presents his summation of 15 years of research observation and teaching about what public sector executives should do to improve the performance of public enterprises This book explicates some of the richest cases used at Harvard s Kennedy School of Government and illuminates their broader lessons for government managers Reproducing Order Richard V. Ericson,University of Toronto. Centre of Criminology,1982-01-01 Professor Ericson and his colleagues

followed the work of patrol officers in a large Canadian regional police force From their direct observations comes a wealth of information quantitatively assembled and qualitatively discussed with insights into the nature of policing This book reveals that the police are not mere referees of our legal lives blowing the whistle on our infractions They are censors of certain types of possibly wrong actions They are selective in their invocation of criminal law and use the law artfully to restore settings to orderliness Ericson emphasizes the routine manner in which the patrol officer intervenes and gains compliance from the citizenry He demonstrates that when the criminal process is invoked the police maintain fundamental control over the court outcome Using these findings he addresses basic questions about the role of police in relation to crime and how it is produced literally by the patrol officer Crime is also seen as the primary basis of police legitimacy which in turn enables the police to engage in broad surveillance and information gathering The author s conclusions about the nature of policing and his discussion of the implications of proposals for reform of police will generate better informed deliberation in political and public decision making and in the general study of sociological theory
