On The Beginning Of Social Inquiry:

On the Beginning of Social Inquiry Peter McHugh, 1974 **On the Beginning of Social Inquiry. [By] Peter McHugh ... Stanley Raffel ... Daniel C. Foss ... Alan F. Blum** Peter MACHUGH, 1974 **Essays on the History of British Sociological Research** Martin Bulmer, 1985-02-07 Traces the history of British sociology and empirical social research over the past hundred years Concludes with a discussion of the applications of the research including the use of social surveys for policymaking and the success of social science in predicting the future **Dewey's Logical Theory** F. Thomas Burke, D. Micah Hester, Robert B. Talisse, 2002 Despite the resurgence of interest in the philosophy of John Dewey his work on logical theory has received relatively little attention Ironically Dewey's logic was his first and last love The essays in this collection pay tribute to that love by addressing Dewey's philosophy of logic from his work at the beginning of the twentieth century to the culmination of his logical thought in the 1938 volume *Logic: The Theory of Inquiry* All the essays are original to this volume and are written by leading Dewey scholars Ranging from discussions of propositional theory to logic's social and ethical implications these essays clarify often misunderstood or misrepresented aspects of Dewey's work while emphasizing the seminal role of logic to Dewey's philosophical endeavors This collection breaks new ground in its relevance to contemporary philosophy of logic and epistemology and pays special attention to applications in ethics and moral philosophy *Karl Popper, Science and Enlightenment* Nicholas Maxwell, 2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world

The Reflexive Initiative Stanley Raffel, Barry Sandywell, 2016-03-31 The Reflexive Initiative is an authoritative intervention in the practice and tradition of reflexive social theory It demonstrates the importance of the reflexive imperative not only in the investigation of everyday life but across a wide range of human sciences and philosophical perspectives Forty years after the publication of *On the Beginning of Social Inquiry* the chapters in this collection range from re-appraisals of earlier essays on topics such as reunions rethinking art and expats to contributions emphasising the opening of radical

dialogues with other reflexive traditions and perspectives These include psychoanalysis Lacan Hegel Rene Girard
 Daseinanalysis dialectical method critical feminism and the dialogical tradition In this dialogical spirit the book contributes to
 the continuing project of analytic theorizing associated with the work of Alan Blum and Peter McHugh and the recent turn to
 more existential topics and politically engaged forms of reflexive research It will be of particular use to students working in
 interpretive traditions of sociology Critical theory Postmodern thought and debates associated with reflexivity and dialectics
 in other disciplines and research programmes *History at the End of the World* Mark Levene, Rob Johnson, Penny
 Roberts, 2010 The authors of this collection of essays propose that climate change means serious peril The approaches begin
 from archaeology literature religion psychology sociology philosophy of science engineering and sustainable development as
 well as straight history Our argument however is not about the science per se It is about us our deep and more recent history
 and how we arrived at this calamitous impasse With contributions from academic activists and independent researchers
 History at the End of the World challenges advocates of business as usual to think again But in its wide ranging assessment
 of how we transcend the current crisis it also proposes that the human past could be our most powerful resource in the
 struggle for survival Conversation Analysis Jack Sidnell, 2009-09-17 Conversation analysis is an approach to the study of
 social interaction that focuses on practices of speaking that recur across a range of contexts and settings The early studies in
 this tradition were based on the analysis of English conversation More recently however conversation analysts have begun to
 study talk in a broader range of communities around the world Through detailed analyses of recorded conversations this
 book examines differences and similarities across a wide range of languages including Finnish Japanese Tzeltal Mayan
 Russian and Mandarin Bringing together interrelated methodological and analytic contributions it explores topics such as the
 role of gaze in question and answer sequences the organization of repair and the design of responses to assessments The
 emerging comparative perspective demonstrates how the structure of talk is inflected by the local circumstances within
 which it operates New Aspects of Politics Charles Edward Merriam, 1925 Embodied Interaction Jürgen
 Streeck, Charles Goodwin, Curtis D. LeBaron, 2011-08-15 Leading international scholars provide a coherent framework for
 analyzing body movement and talk in the production of meaning The Ideological Condition: Selected Essays on History,
 Race and Gender Himani Bannerji, 2020-09-25 The Ideological Condition Selected Essays on History Race and Gender is a
 reader comprised of many of Himani Bannerji's English writings over a long period of teaching and research in Canada and
 India Bannerji creates an interdisciplinary analytical method and extends the possibilities of historical materialism by
 predominantly drawing on Marx Gramsci and Dorothy Smith Essays here instantiate Marx's general proposition that while all
 ideology is a form of consciousness all forms of consciousness are not ideological Applying this insight to issues ranging from
 patriarchy through race class nationalism liberalism and fascism Bannerji breaks through East West binaries challenging the
 mystifying approaches to the constitution of the social and shows that a sustained struggle against ideological thinking is at
