On the National Question VI Lenin, 2025-01-28 Tsarist Russia was a prison house of nations A majority of the population belonged to national groups oppressed by the tsarist regime which suppressed their languages their religions and their cultures The national question was therefore crucial from the point of view of the workers movement It could only be solved with a revolutionary programme This was a complex question which required firmness in principle and extraordinary flexibility in tactics in combining two different aspects the unity of the working class in one party cutting across national barriers in the common struggle against autocracy and the defence of right of nations of to self determination including their right to form an independent country if they so wished Lenin s ideas and method shine as a remarkable example of this approach The struggle with the Jewish Workers Union the Bund and the polemic with the Polish Social Democrats clarified the revolutionary perspective on the national question Once in power Lenin and the Bolsheviks carried out their programme in practice in the extremely difficult conditions of the civil war and foreign military intervention It was precisely the national question which formed the battleground for Lenin s last struggle against the rising bureaucracy and its heavy handed Great Russian chauvinist approach The national question once again is coming to the fore in this epoch of crisis and instability Lenin s patience and his method of putting forward a class perspective on this question is a rich tradition for communists to learn from today

The State, Identity, and the National Question in China and Japan Germaine A. Hoston, 2021-02-09 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension

with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model

Socialism and International Economic Order Elisabeth L. Tamedly,1969 The theory of international economic order is concerned with two basically different types of human relationships those that belong to the private sphere of the individual and which are amenable to the rule of law the dominium and those that are backed by sovereign national power the imperium It is very important to know which fields of human activity are subject within a given state to imperium and which are left to the regulating influence of market values and private law
