On The Track Of A Prehistoric Economy:

On the Track of a Prehistoric Economy H. P. Blankholm, 1994 **Mesolithic Settlement in the North Sea Basin** Clive Waddington, 2007-12-20 The archaeological remains at Howick consist of a Mesolithic hut site and an Early Bronze Age cist cemetery located on a modern cliff edge overlooking a small estuary This volume is devoted solely to the reporting and interpretation of the Mesolithic remains Three huts had been constructed on the Howick site all on the same footprint with no evidence to indicate a gap between these occupations and the remains inside the hut were all consistent with its use as a habitation site The lithic material from Howick is the most accurately dated assemblage from any British Mesolithic site and is a classic example of a narrow blade industry Typically for Britain these sites date from around 7500 cal BC but the Howick dates indicate an earlier start for this type of industry The chipped stone assemblage from Howick is all made from locally occurring beach pebble flint which fits into the wider pattern of localised raw material acquisition by groups elsewhere in North East England A wide variety of tool types were found within the hut reflecting the diverse activities that appear to have taken place there With such a wide range of resources on offer on a year round basis the site is interpreted as a base camp settlement that was used by the same group and their descendants over a period of several generations lasting for somewhere in the region of 200 years The size of the hut indicates its use by a family sized group The Howick excavations have forced a rethink of the scale and nature of Mesolithic settlement in North East England as well as the relationship between this and other regions around the North Sea Basin It is hoped that this work will help encourage further research into the Mesolithic of the region and its interactions with adjacent areas of upland other North Sea Basin communities as well as groups occupying the lands further north and south *The A to Z of Denmark* Alastair H. Thomas, 2010-05-10 Denmark is the oldest monarchy in Europe At different points in its history Denmark's boundaries have encompassed England Sweden West Africa India and the West Indies Despite its changing and relatively small boundaries Denmark has played a much larger part in the politics of Europe than might be expected Additionally through its territories Faroe Islands and Greenland Denmark has managed to retain an important presence in the North Atlantic Today democratic Denmark with its thriving capital Copenhagen is peaceful prosperous and progressive Within NATO Denmark has contributed to peace keeping in the Persian Gulf and Bosnia The Danish Model of welfare gives Danes a real sense of social security and presents many naysayers with a provocative example of a successfully managed welfare state Danes have a reputation for inventiveness and good design whether in architecture furniture or industrial design The A to Z of Denmark relates the history of this successful country through a chronology an introductory essay appendixes a bibliography and hundreds of cross referenced dictionary entries on kings politicians officials explorers authors architects composers painters astronomers educationists reformers political parties social movements and other aspects of Danish society **Life and Death in the Mesolithic of Sweden** Mats Larsson, 2017-01-31 Over the last 20 years a vast number of new and important Swedish

Mesolithic sites have been excavated and published in different ways as articles books and site reports As yet there has been no study that tries to bring the loose ends together and so the main task of this important new work by one of Sweden s leading prehistorians is to provide an extensive overview of some of the main sites and results The time span is long c 10 000 4000 BC and the amount and choice of data very large so rather than attempt to describe everything in detail Mats Larsson focuses on a series of fundamental research perspectives concerning Mesolithic lifeways and settlement patterns and chooses key sites to illustrate them The emphasis is on southern and middle Sweden though the country s northern regions are in no way forgotten This companion piece to the author s recent successful volume *Paths Towards a New World Neolithic in Sweden* written for a general audience is also a must for all those archaeologists interested in the Mesolithic of Northern Europe and would be students of prehistory

The Prehistoric Settlement of Britain Richard Bradley, 2014-10-24 This study first published in 1978 explores the evidence for pre Roman settlement in Britain Four aspects of the prehistoric economy are described by the author colonisation and clearance arable and pastoral farming transhumance and nomadism and hunting gathering and fishing These aspects have been brought together to formulate a structure which contains the evidence more naturally than chronological schemes that depend on assumed changes in population or technology The book draws upon environmental evidence and recent developments in archaeological fieldwork It also provides an extensive exploration of the published literature on the subject and the scope of the evidence Originally conceived as an ideas book rather than a final synthesis the author s intention throughout is to stimulate argument and research and not to replace one dogma with another

Tracking Prehistoric Migrations Jeffery J. Clark, 2001-02 This monograph takes a fresh look at migration in light of the recent resurgence of interest in this topic within archaeology The author develops a reliable approach for detecting and assessing the impact of migration based on conceptions of style in anthropology From numerous ethnoarchaeological and ethnohistoric case studies material culture attributes are isolated that tend to be associated only with the groups that produce them Clark uses this approach to evaluate Puebloan migration into the Tonto Basin of east central Arizona during the early Classic period A D 1200 1325 focusing on a community that had been developing with substantial Hohokam influence prior to this interval He identifies Puebloan enclaves in the indigenous settlements based on culturally specific differences in the organization of domestic space and in technological styles reflected in wall construction and utilitarian ceramic manufacture Puebloan migration was initially limited in scale resulting in the co residence of migrants and local groups within a single community Once this co residence settlement pattern is reconstructed relations between the two groups are examined and the short term and long term impacts of migration are assessed The early Classic period is associated with the appearance of the Salado horizon in the Tonto Basin The results of this research suggest that migration and co residence was common throughout the basins and valleys in the region defined by the Salado horizon although each local sequence relates a unique story The methodological and theoretical implications of Clark s work extend well beyond the

Salado and the Southwest and apply to any situation in which the scale and impact of prehistoric migration are contested

Sherratt, 2019-08-07 This book brings together a classic collection of Andrew Sherratt's work on the economic foundations of prehistoric Europe which have put forward important new ideas about the development of farming pastoralism early technology and trade In a series of contributions that have included wide ranging syntheses and detailed local studies he discusses their implications for the understanding of settlement patterns social structures material culture and less tangible aspects of prehistoric life such as the spread of languages and the use of narcotics

Recent Advances in Ageing and Sexing Animal Bones Deborah Ruscillo, 2015-06-30 This volume in the ICAZ series deals with the technical advances made over the last twenty years in the field of ageing and sexing animal bones The analysis of ancient DNA holds great possibilities for sexing certain faunal assemblages though by no means all which is an urgent issue in the study of hunting and animal husbandry It can be assumed that our forebears used more subtle taxonomic criteria than we do today and it is important therefore that we are able to recognise traits that will allow for more accurate classification in terms of calendar age or sex The eighteen papers in this book examine the state of research for various techniques of age sex determination and assess potential future development

Pigs and Humans Umberto Albarella, Keith Dobney, Anton Ervynck, Peter Rowley-Conwy, 2007-12-06 Pigs are one of the most iconic but also paradoxical animals ever to have developed a relationship with humans This relationship has been a long and varied one from noble wild beast of the forest to mass produced farmyard animal from a symbol of status and plenty to a widespread religious food taboo from revered religious totem to a parodied symbol of filth and debauchery Pigs and Humans brings together some of the key scholars whose research is highlighting the role wild and domestic pigs have played in human societies around the world over the last 10 000 years The 22 contributors cover a broad and diverse range of temporal geographical and topical themes grounded within the disciplines of archaeology zoology anthropology and biology as well as art history and history They explore such areas as evolution and taxonomy domestication and husbandry ethnography and ritual and art and present some of the latest theories and methodological techniques The volume as a whole is generously illustrated and will enhance our understanding of many of the issues regarding our complex and ever changing relationship with the pig

Handbook to Life in Prehistoric Europe Jane McIntosh,2009-06-01 For most of Europe s long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunter gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe s massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail *Handbook to Life in Prehistoric Europe* gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire

Sea-level Change in Mesolithic Southern Scandinavia Peter Moe Astrup,2018-12-17 The seabed in southern Scandinavia contains numerous traces of a submerged landscape that is thought to be the remnant of a once important habitat for Mesolithic hunter gatherers Large parts of this landscape were gradually flooded by rising seas between 9500 and 4000 BC and perceptions of the Maglemose culture 9500 6400 BC have consequently been based almost exclusively on former inland settlements As a result Early and Late Mesolithic societies have been understood as almost diametrically opposed with regards to their reliance upon marine resources and their degree of sedentism The main objective of the book is to investigate two questions that are directly related to our current understanding of the populations of the now submerged areas

- 1 Do we have a representative picture of the spread of Early Mesolithic sites in southern Scandinavia or does the weighting towards inland sites reflect the fact that coastal sites have not been identified below present day sea level
- 2 How did sea level changes impact Mesolithic populations at different temporal and spatial scales and how were these experienced from 8000 4000 BC

The book presents an extensive and up to date review of various types of evidence from the Boreal period such as faunal remains fishing instruments $\delta^{13}C$ values in bones settlement positions and available marine

resources These are used to discuss the extent to which marine resources were utilised in the Maglemose culture Another central component of this book is a series of new coastline models made to determine the Mesolithic sea level changes coastline positions The eight new coastline models are created to facilitate new evaluations of possible relationships between sea level changes and cultural changes On the basis of the new coastline models the book also presents the preliminary results of 47 diver investigations conducted with the aim of identifying potential coastal settlements from the Maglemose culture

The Prehistory of Iberia María Cruz Berrocal,Leonardo García Sanjuán,Antonio Gilman,2013-03-05 The origin and early development of social stratification is essentially an archaeological problem The impressive advance of archaeological research has revealed that first and foremost the pre eminence of stratified or class society in today s world is the result of a long social struggle This volume advances the archaeological study of social organisation in Prehistory and more specifically the rise of social complexity in European Prehistory Within the wider context of world Prehistory in the last 30 years the subject of early social stratification and state formation has been a key subject on interest in Iberian Prehistory This book illustrates the differing forms of resistances the

interplay between change and continuity the multiple paths to and from social complexity and the failures of states to form in Prehistory It also engages with broader questions such as when did social stratification appear in western European Prehistory What factors contributed to its emergence and consolidation What are the relationships between the notions of social complexity social inequality social stratification and statehood And what are the archaeological indicators for the empirical analysis of these issues Focusing on Iberia but with a permanent connection to the wider geographical framework this book presents for the first time a chronologically comprehensive up to date approach to the issue of state formation in prehistoric Europe
