Pawson, 2013-02-01 Evaluation researchers are tasked with providing the evidence to guide programme building and to assess its outcomes As such they labour under the highest expectations bringing independence and objectivity to policy making They face huge challenges given the complexity of modern interventions and the politicised backdrop to all of their investigations They have responded with a huge portfolio of research techniques and through their professional associations have set up schemes to establish standards for evaluative inquiry and to accredit evaluation practitioners A big question remains Has this monumental effort produced a progressive cumulative and authoritative body of knowledge that we might think of as evaluation science This is the question addressed by Ray Pawson in this sequel to *Realistic Evaluation and Evidence based Policy* In answer he provides a detailed blueprint for an evaluation science based on realist principles

**State Looteries** Kasey Henricks, David G. Embrick, 2016-08-12 Fifty years ago familiar images of the lottery would have been strange as no state lottery existed then Few researchers have uncovered the obscure role lotteries play in the changing composition of American taxation Even less is known about what role race plays in this process More than simply taxing those on the social margins the emergence of state lotteries in contemporary American history represents something much

more fundamental about state fiscal policy This book not only uncovers the underlying racial factors that contextualize lottery proliferation in the U S but also reveals the racial consequences that lotteries have in terms of redistributing tax liability

[Reforming Early Retirement in Europe, Japan and the USA](#) Bernhard

Ebbinghaus, 2008-10-16 Since the 1970s early exit from work has become a major challenge in modern welfare states. Governments, employers, and unions alike once thought of early retirement as a peaceful solution to the economic problems of mass unemployment and industrial restructuring. Today governments and international organizations advocate the postponement of retirement and an increase in activity among older workers. Comparing the USA, eight European countries, and Japan, this book demonstrates significant cross-national differences in early retirement across countries and over time. The study evaluates the impact of major variations in welfare regimes, production systems, and labor relations. It stresses the importance of the pull factor of extensive welfare state provisions, particularly in Continental Europe, and the push factor of labor shedding strategies by firms, particularly in Anglo-American market economies, and the role of employers and worker representatives in negotiating retirement policies, particularly in coordinated market economies. Over the last three decades, early retirement has become a popular social policy and employment practice in the workplace, adding to the fiscal crises and employment problems of today's welfare states. Attempts to reverse early retirement policies have led to major reform debates. Unilateral government policies to cut back on social benefits have not had the expected employment results due to resistance from employers, workers, and their organizations. Successful reforms require the cooperation of both sides. This study provides comprehensive empirical analysis and a balanced approach to studying both the pull and the push factors affecting early exit from work, needed to understand the development of early retirement regimes.
