Edwards III, 2008-10-01 American presidents often engage in intensive campaigns to obtain public support for their policy initiatives This core strategy for governing is based on the premise that if presidents are skilled enough to exploit the bully pulpit they can successfully persuade or even mobilize public opinion on behalf of their legislative goals In this book George Edwards analyzes the results of hundreds of public opinion polls from recent presidencies to assess the success of these efforts Surprisingly he finds that presidents typically are not able to change public opinion even great communicators usually fail to obtain the public's support for their high priority initiatives Focusing on presidents personae their messages and the American public he explains why presidents are often unable to move public opinion and suggests that their efforts to do so may be counterproductive Edwards argues that shoring up previously existing support is the principal benefit of going public and that staying private negotiating quietly with elites may often be more conducive to a president's legislative success      *The Measurement of Emotions* Robert Plutchik, Henry Kellerman, 2013-09-24 Emotion Theory Research and Experience Volume 4 The Measurement of Emotion provides an examination of the key issue of how to measure emotion The book contains articles that present different approaches to the study of emotional measurement Contributors focus on such topics as mood measurement cross cultural examination of triggers of emotion possible dimensions that underlie the language of affect measurement of emotions in lower animals and measuring emotions and their derivatives Psychologists psychiatrists behavioral psychologists teachers and students will find the book a good reference book      *Persuasive Communication* Richard O.
