Olivia Saracho, Bernard Spodek, 2002-04-01 This volume identifies and critically analyzes research studies related to the critical skills environments and adult interactions that contribute to young children's literacy development. The volume reminisces on the reformation that has emerged in the language and literacy education of young children. Prior to the 1960s, few studies were available on pre-first grade literacy. Then studies began to emerge in the 1960s focusing on the reading readiness paradigm and on the conventional assumption that literacy development was only introduced when children experienced formal reading instruction in school. Sulzby and Teale (1986) identified the following concepts about young children's acquisition of literacy learning: 1. Literacy development originates well before children are introduced to formal instruction. 2. The notion that reading precedes writing or that writing precedes reading is a fallacy. 3. Literacy blooms in real-life settings and by performing real-life activities that are used to get things done. 4. The purposes of literacy for young children are as important in learning about writing and reading as are the dimensions of literacy. 5. Children's cognitive development is important to their acquisition of literacy during the years from birth to six. 6. Children learn written language when they actively engage in their world. Competent teachers throughout the United States suggest that prior to attending school, children have acquired a distinctive culture, collection of experiences, and group of abilities. Vacca and Vacca (2000) state that many prekindergarten children have been in a group setting for three and four years, such as a child care setting where teachers and caregivers teach them reading and writing.

*The Eagle and the Hart* Helen Castor, 2024-10-15 From an acclaimed historian and author comes an epic history the dual biography of Richard II and Henry IV two cousins whose lives played out in extraordinary parallel until Henry deposed the tyrant Richard and declared himself King of England Richard of Bordeaux and Henry of Bolingbroke cousins born just three months apart were ten years old when Richard became king of England They were thirty two when Henry deposed him and became king in his place Now the story behind one of the strangest and most fateful events in English history and the inspiration behind Shakespeare's most celebrated history plays is brought to vivid life by the acclaimed author of *Blood and Roses* Helen Castor Richard had birthright on his side and a profound belief in his own God given majesty But beyond that he lacked all qualities of leadership A narcissist who did not understand or accept the principles that underpinned his rule he was neither a warrior defending his kingdom nor a lawgiver whose justice protected his people Instead he declared that his laws were in his own mouth and acted accordingly He sought to define as treason any resistance to his will and recruited a private army loyal to himself rather than the realm and he intended to destroy those who tried to restrain him Henry was everything Richard was not a leader who inspired both loyalty and friendship a soldier and a chivalric hero dutiful responsible principled After years of tension and conflict Richard banished him and seized his vast inheritance Richard had been crowned a king but he had become a tyrant and as a tyrant ruling by arbitrary will rather than established law he was deposed by his cousin Henry the only possible candidate to take his place Henry was welcomed as a liberator a champion of the people against his predecessor's paranoid despotism But within months he too was facing rebellion Men knew that a deposer could in turn be deposed and the new king found himself buffeted by unrest and by chronic ill health until he seemed a shadow of his former self trapped by political uncertainty and troubled by these signs that God might not after all endorse his actions Captivating immersive and highly relevant to today's times *The Eagle and the Hart* is a story about what happens when a ruler prioritizes power over the interests of his own people When a ruler demands loyalty to himself as an individual rather than duty to the established constitution and when he seeks to reshape reality rather than concede the force of verifiable truths Above all it is a story about how a nation was brought to the brink of catastrophe and disintegration and in the end how it was brought back
