Shaping Tomorrow's World Elke Seefried, 2024-05-01 *Shaping Tomorrow's World* tells the crucial story of how futures studies developed in West Germany, Europe, the US, and within global futures networks from the 1940s to the 1980s. It charts the emergence of different approaches and thought styles within the field, ranging from Cold War defense intellectuals such as Herman Kahn to critical peace activists like Robert Jungk. Engaging with the challenges of the looming nuclear war, the changing phases of the Cold War, 1968, and the growing importance of both the Global South and environmentalism, this book argues that futures scholars actively contributed to these processes of change. This multiple award-winning study combines national and transnational perspectives to present a unique history of envisioning, forecasting, and shaping the future. *On Thermonuclear War* Herman Kahn, Evan Jones, 2017-07-12 *On Thermonuclear War* was controversial when originally published and remains so today. It is iconoclastic, crosses disciplinary boundaries, and finally, it is calm and compellingly reasonable. The book was widely read on both sides of the Iron Curtain, and the result was serious revision in both Western and Soviet strategy and doctrine. As a result, both sides were better able to avoid disaster during the Cold War. The strategic concepts still apply: defense, local animosities, and the usual balance of power issues are still very much with us. Kahn's stated purpose in writing this book was simply avoiding disaster and buying time without specifying the use of this time. By the late 1950s, with both sides H-bomb armed, reason and time were in short supply. Kahn, a military analyst at RAND since 1948, understood that a defense based only on thermonuclear armaments was inconceivable, morally questionable, and not credible. The book was the first to make sense of nuclear weapons. Originally created from a series of lectures, it provides insight into how policymakers consider such issues. One may agree with Kahn or disagree with him on specific issues, but he clearly defined the terrain of the argument. He also looks at other weapons of mass destruction, such as biological and chemical, and the history of their use. The Cold War is over, but the nuclear genie is out of the bottle, and the lessons and principles developed in *On Thermonuclear War* apply as much to today's China, Russia, Iran, and North Korea as they did to the Soviets.

**Experts, Social Scientists, and Techniques of Prognosis in Cold War America** Christian Dayé, 2019-12-16 This book describes how Cold War researchers used expert opinions to construct foreknowledge of geopolitical relevance. Focusing on the RAND Corporation, an American think tank with close relations to the armed forces, Dayé analyses the development of two techniques of prognosis: the Delphi technique and Political Gaming. Based on archival research and interviews, the chapters explore the history of this series of experiments to understand how contemporary social scientists conceived of one of the core categories of the Cold War: the expert, and uncover the systematic use of expert opinions to craft prognoses. This consideration of the expert's role in Cold War society and what that can tell us about the role of the expert today will be of interest to students and scholars across the history of science, the sociology of knowledge, future studies, the history of the Cold War, social science methodology, and social policy. **Life Under a Cloud** Allan M. Winkler, 1999 Presents

an account of the impact of the atomic bomb on American political and cultural life This title delineates how fears of nuclear disaster have become a part of our culture Tracing the debate over military and civilian uses of atomic power it reveals the irony anxiety and official insanity of the atomic age      **Coercion** J. Roland Pennock, John W Chapman, 2017-07-12 Coercion it seems like poverty and prejudice has always been with us Political thinkers and philosophers have been arguing its more direct and personal consequences for centuries Today at a point in history marked by dramatic changes and challenges to the existing military political and social order coercion is more at the forefront of political activity than ever before While the modern state has no doubt freed man from some of the forms of coercion by which he has traditionally been plagued we hear now from all sectors of society complaints about systematic coerciveness not only on the national and international levels but on the individual level as well      *American Book Publishing Record Cumulative, 1950-1977* R.R. Bowker Company. Department of Bibliography, 1978      **Futures Thinking** Christian Dayé, 2025-07-22 This book starts from the assumption that futures thinking is difficult yet of existential necessity We live in times where the future of humanity is at stake Thus it is important to understand where the images of the future that currently circulate in our cultures and societies come from This book is about two fields in the social sciences that explicitly concentrate on futures studies and the sociology of the future Informed by sociological theories it applies bibliometric methods to describe these two fields as epistemic tribes and territories After reflecting on the historical reasons for this bipartite academic institutionalization the book explores how the two fields could achieve a diligent division of labor that encourages forms of futures thinking that speak to the societal and civilizational needs of our times      **Real Time Strategy** Andreas Schühly, Frank Becker, Florian Klein, 2020-04-29 Combining classical scenario thinking the gentle art of perception with the analytical power of big data and artificial intelligence Real Time Strategy presents the decision making of the future which enables decision makers to develop dynamic strategies monitor their validity and react faster      [The Politics of Peace](#) Petra Goedde, 2019-01-12 During a television broadcast in 1959 US President Dwight D Eisenhower remarked that people in the long run are going to do more to promote peace than our governments Indeed I think that people want peace so much that one of these days our governments had better get out of the way and let them have it At that very moment international peace organizations were bypassing national governments to create alternative institutions for the promotion of world peace and mounting the first serious challenge to the state centered conduct of international relations This study explores the emerging politics of peace both as an ideal and as a pragmatic aspect of international relations during the early cold war It traces the myriad ways in which a broad spectrum of people involved in and affected by the cold war used altered and fought over a seemingly universal concept These dynamic interactions involved three sets of global actors cold war states peace advocacy groups and anti colonial liberationists These transnational networks challenged and eventually undermined the cold war order They did so not just with reference to the United States the Soviet Union and Western Europe but also by addressing the violence of national liberation movements in

the Third World As Petra Goedde shows in this work deterritorializing the cold war reveals the fractures that emerged within each cold war camp as activists both challenged their own governments over the right path toward global peace and challenged each other over the best strategy to achieve it The Politics of Peace demonstrates that the scientists journalists publishers feminists and religious leaders who drove the international discourse on peace after World War II laid the groundwork for the eventual political transformation of the Cold War *The Industrial Defense Program of the Department of Defense, with Special Reference to Army Personnel Administration Aspects Thereof* Albert John Grazioli, 1965 **History of Atomic Energy Collection at Oregon State University**, 1990 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1972 **Glimmer of a New Leviathan** Campbell Craig, 2003-12-30 The Second World War put an end to America's historical isolation from international power politics and so also to the long standing American defiance of the Realist ideology that shaped Old World affairs The advent of transoceanic military technologies now wielded by menacing states such as Nazi Germany and the Soviet Union made Americans more receptive to the Realist idea that international relations is about fear and survival The American Realists Reinhold Niebuhr Hans Morgenthau and Kenneth Waltz developed a modern strategic framework that sought to introduce American leaders and the educated public to these harsher realities of international politics They emphasized a clear eyed cold approach to the play of interests egotism and the drive for power in world affairs a struggle in which the threat of major war remained in the end the only legitimate currency Yet even as Americans began to accept this new Realism thermonuclear weaponry threatened to make it absurd A major war to defend the nation might result in its total destruction a thermonuclear war leading to the death of hundreds of millions of citizens seemed an unusual way to preserve American survival This dilemma became central to the Realist understanding of Niebuhr Morgenthau and Waltz How could a Realist approach to international politics and war be sustained in the face of possible global annihilation Glimmer of a New Leviathan is the engrossing story of how the three chief architects of an influential ideology struggled with the implications of their own creation It offers crucial historical context for contemporary debates about weapons of mass destruction and the post Cold War international order **Advancing Peace Research** Joel David Singer, 2012 Professor J David Singer has been arguably the most important influence on quantitative research into the causes and attributes of war His pioneering work on the Correlates of War project at the University of Michigan and his numerous books and articles have inspired generations of researchers in the fields of international relations conflict analysis security studies and peace science This collection is a carefully selected overview of his work which provides not only an excellent introduction to his considerable methodological theoretical and empirical contributions but also an intellectual history of developments in the field of international relations which are reflected in Professor Singer's work This is essential reading for all those with an interest in the use of quantitative methods in social science the changing nature of the study of international relations and the analysis of war and peace The Bonn Handbook of Globality Ludger Kühnhardt, Tilman

Mayer,2019-02-26 This two volume handbook provides readers with a comprehensive interpretation of globality through the multifaceted prism of the humanities and social sciences Key concepts and symbolizations rooted in and shaped by European academic traditions are discussed and reinterpreted under the conditions of the global turn Highlighting consistent anthropological features and socio cultural realities the handbook gathers coherently structured articles written by 110 professors in the humanities and social sciences at Bonn University Germany who initiate a global dialogue on meaningful and sustainable notions of human life in the age of globality Volume 1 introduces readers to various interpretations of globality and discusses notions of human development communication and aesthetics Volume 2 covers notions of technical meaning of political and moral order and reflections on the shaping of globality **Diabetes Literature Index** ,1965

The Realist Tradition in International Relations Barry Scott Zellen,2011-08-19 This comprehensive foundation for the study of realism will introduce students in disciplines as varied as philosophy international relations and strategic studies to the majestic breadth of the realist tradition that unifies them all The Realist Tradition in International Relations The Foundations of Western Order introduces the principal theorists who have shaped and defined the realist tradition This once dominant theory of international politics has reemerged to provide a shared foundation for understanding political theory international relations theory and strategic studies The work is comprised of four volumes each focusing upon a distinct period and the pivotal contributors writing in that era Volume 1 State of Hope looks at the classical era when chaos reigned supreme Volume 2 State of Fear goes through the early modern period and the emergence of the modern state Volume 3 State of Awe explores the age of total war with its unprecedented dangers Volume 4 State of Siege examines the present era of insurgency and asymmetrical conflict A truly monumental work this sweeping study will surely foster a new appreciation of the rich tapestry of realist thought and its continuing relevance to the study of world politics **Crossing Boundaries in the Americas, Vietnam, and the Middle East** Ron Young,2014-10-08 Crossing Boundaries in the Americas Vietnam and the Middle East is the personal yet profoundly political first person account of one man s unique interracial and interfaith leadership roles over five decades in movements for civil rights against the Vietnam War and for Arab Israeli Palestinian peace Ron Young s story told with honesty humility and humor gives an insider view of key events in these movements and personalizes a significant strain of modern American history not often afforded sufficient attention in either the textbooks or the mainstream press This book is an important read for anyone interested in these issues and movements It should be recommended reading for students in colleges and high schools Problems of Communism ,1961 *Context and Pretext in Conflict Resolution* Kevin Avruch,2015-11-17 Written by a distinguished scholar this book explores themes of culture identity and power as they relate to conceptions of practice in conflict resolution and peacebuilding Among the topics covered are ethnic and identity conflicts culture relativism and human rights post conflict trauma and reconciliation and modeling varieties of conflict resolution practice Context and Pretext in Conflict Resolution is the winner of the 2014 Conflict
