**Natural Kinds and Conceptual Change** Joseph LaPorte,2003-12-08 According to the received tradition the language used to refer to natural kinds in scientific discourse remains stable even as theories about these kinds are refined In this illuminating book Joseph LaPorte argues that scientists do not discover that sentences about natural kinds like Whales are mammals not fish are true rather than false Instead scientists find that these sentences were vague in the language of earlier speakers and they refine the meanings of the relevant natural kind terms to make the sentences true Hence scientists change the meaning of these terms This conclusions prompts LaPorte to examine the consequences of this change in meaning for the issue of incommensurability and for the progress of science This book will appeal to students and professional in the philosophy of science the philosophy of biology and the philosophy of language

*The Growing-Block View* Graeme Forbes,2025-05-15 What makes time interesting and what is time Graeme A Forbes presents a robust defence of the metaphysical asymmetry between past and future providing a compelling argument for the acceptance of the Growing Block view Taking us from the armchair to philosophy of physics and then out to the human world Forbes considers the ontological questions that have been the focus of most of the literature on the metaphysics of time Across three parts he addresses questions central to the philosophy of time Part I asks why we should think that time does something that space does not Part II examines why we should think that the past differs in some metaphysically interesting way from the future and Part III shows why we should accept the Growing Block view the view on which the past exists the future doesn t and the passage of time is causation bringing about events in accordance with the laws of nature This wide ranging and engaging exploration of persistence experience agency and more makes a radical contribution to our understanding of the philosophy of time

Ryder,M.L. Byrd,2012-12-06 There is a saying he is a person who can charm the birds from the trees This might well be applied to Kurt Benirschke Indeed it describes both his warm personality and his intimate interaction with nature He might be considered a modern adept of the Greek and Roman Stoic school of philosophy which taught an understanding of man as integrated into nature in its totality The right way to live is according to nature with nature as part of it This at the same time means humanity and Kurt Benirschke impresses us not only as an outstanding scientist but also as a humanist who has had a lifelong love affair with nature The foundation of Springer Verlag New York in 1964 offered a great opportunity for getting together with eminent authors in the United States Kurt Benirschke was one of them and his book Pathology of the Placenta was highly acclaimed all over the world My attention was first called to him by my dear friend Dr Ernst Uhlinger then a pathologist in Zurich With a sharp and critical eye he followed the international literature on pathology and discovered the genius of Kurt Benirschke Our first encounters led to a relationship of trust which in turn grew into friendship I soon learned to esteem the special qualities of the man and the scientist in fact they cannot be separated The Last Panda George B. Schaller,1994-09-14 Dependent on a shrinking supply of bamboo hunted mercilessly for its pelt and hostage to profiteering schemes once in captivity the panda is on the brink of extinction Here acclaimed naturalist George Schaller uses his great evocative powers and the insight gained by four and a half years in the forests of the Wolong and Tangjiahe panda reserves to document the plight of these mysterious creatures and to awaken the human compassion urgently needed to save them No scientist is better at letting the rest of us in on just how the natural world works no poet sees the world with greater clarity or writes about it with more grace Anyone who genuinely cares for wildlife cannot help being grateful to Schaller both for his efforts to understand the panda and for

the candor with which he reports what has gone so badly wrong in the struggle to save it from extinction Geoffrey C Ward New York Times Book Review Schaller's book is a unique mix of natural history and the politics of conservation and it makes for compelling reading Having been in giant panda country myself I found some of the descriptions of the animals and habitats breathtaking Schaller describes the daily routines and personalities of the giant pandas he studied as well as their fates thereafter as though they were his blood relatives Schaller's brilliant presentation of the complexities of conservation makes his book a milestone for the conservation movement Devra G Kleiman Washington Post Book World George Schaller's most soulful work written in journal style with many asides about a creature who evolved only two to three million years ago about the same time as humans Here conservation biology confronts an evil that grinds against hope and shatters the planet's diversity Written with hope Whole Earth Catalog A nicely crafted blend of wildlife observation and political cultural analysis The Last Panda is a sad chronicle of our failure so far to stem the decline of the animal that may be the most beloved on the planet Donald Dale Jackson Smithsonian *Action, Mind, and Brain* David A. Rosenbaum, 2022-02-08 An engaging and accessible introduction to the psychology and neuroscience of physical action This engaging and accessible book offers the first introductory text on the psychology and neuroscience of physical action Written by a leading researcher in the field it covers the interplay of action mind and brain showing that many core concepts in philosophy psychology neuroscience and technology grew out of questions about the control of everyday physical actions It explains action not as a one way street from stimuli to response but as a continual perception action cycle The informal writing style invites students to think through the evidence step by step helping them develop general thinking skills as well as learn specific facts Special emphasis is placed on the role of underrepresented groups The book discusses the intellectual background of the field from Plato to Kant Dewey and others applications and methods and the physical substrates of action bones tendons ligaments muscles and nerves It considers the control of actions in space learning and the roles of nature and nurture feedback feedforward or anticipated feedback and degrees of freedom the multiple ways of getting things done and three methods for narrowing the alternatives The book is generously illustrated including many images of thinkers who contributed to the field
