Rhabdomyosarcoma and Related Tumors in Children and Adolescents Harold M. Maurer, Frederick B. Ruymann, Carl E. Pochedly, 1991-09-11 Rhabdomyosarcoma is one of the most common malignant solid tumors of children and adolescents This book provides a comprehensive review of current knowledge and addresses the many complex issues in the diagnosis and treatment of the tumor It represents the results of 15 years of research by the Intergroup Rhabdomyosarcoma Study which is a large multi national collaborative project that has made significant progress in elucidating the epidemiological biological and clinical characteristics of these malignancies All researchers pediatricians and other physicians who work with Rhabdomyosarcoma will find an incredible amount of valuable information in this book

Oncogenes and Tumor Suppressor Genes in Human Malignancies Christopher Benz, E.T. Liu, 2012-12-06 The first edition of Oncogenes 1989 focused on several of the better known transforming mechanisms and surveyed a spectrum of solid tumors and hematologic malignancies Several of the nearly 50 known oncogenes most relevant to human disease were examined In contrast this volume presents a very different profile and balance of subject material that reflects the rapidly changing field of molecular oncology and its newly emerging concepts Among the most important discoveries of the past 4 years are the identification of nearly a dozen different tumor suppressor genes and the finding of an entirely new class of cancer causing gene bcl 2 that acts by inhibiting cell death rather than stimulating cell proliferation This edition begins by reviewing selected malignancies in which our earlier search for clinically relevant oncogenes has led to more focused studies on gain of function and loss of function genetic abnormalities as well as autocrine and paracrine growth factor loops known to regulate tumor physiology and malignant cell behavior Curiously many of these genetic and functional abnormalities are shared by several different tumor types and are not uniformly present in all tumors of the same type This observation brings up molecular questions about the tissue specific determinants that underlie individual cancers and also gives added impetus to the suggestion that molecular abnormalities referred to as tumor markers be included among the histopathologic features used for clinical diagnosis and management

Diagnostic and Therapeutic Advances in Pediatric Oncology David O. Walterhouse, Susan L. Cohn, 2012-12-06 The purpose of Diagnostic and Therapeutic Advances in Pediatric Oncology for the Cancer Treatment and Research Series is to provide an up to date summary of how recent advances in cancer research are being applied to the care of children with solid tumors The interface of cancer research with clinical practice in pediatric oncology has never been

more intimate than today While researchers are identifying oncogenes and tumor suppressor genes and are studying their specific functions clinicians are using knowledge of oncogenes and tumor suppressor genes for diagnosing cancer in children for therapeutic decision making purposes and for prognostic purposes The first three chapters in this book describe models for understanding the causes of childhood cancer that were perhaps initially identified by clinicians and that are now being studied and understood by researchers These chapters will describe research evidence that supports roles for the involvement of normal developmental regulatory genes in childhood oncogenesis of abnormal immune regulation in childhood oncogenesis and of heredity in childhood oncogenesis The next eight chapters are devoted to descriptions of the application of new research developments to clinical practice with reference to the most common forms of solid tumors of childhood outside the central nervous system The final chapter will describe late effects of childhood cancer and its therapy and the impact research is having on understanding and perhaps preventing these late effects *Oncology of Infancy and Childhood E-Book* Stuart H.
