Hanssens,2012-12-06 This report for the Belgian Ophthalmological Society concerns a number of fundus diseases which most ophthalmologists only rarely encounter Still it is of importance that they should be able to recognize them not only because most of these eye diseases are treatable when they are diagnosed early enough but also because they are sometimes associated with major visceral and neurological problems The ophthalmologist may be the first practitioner to suspect a von Hippel Lindau s disease or a neurofibromatosis He should realize at that moment that his role is not only to treat the eyes but also to advise his patient refer him to other specialists and consider the genetical implications of his diagnosis Clinicopathologic correlations are of great importance and we felt that it was necessary to emphasize the histopathological aspect of these diseases A report has to overview the literature on a specific topic The literature on vascular tumors of the fundus is extremely vast and even if we tried to be as complete as possible we must confess that we did not cite every author who published on such cases A third aspect which was considered as important was to provide sufficient clinical and histopathologic examples of the various disease which are reviewed We are indebted to a large number of friends who kindly authorized the publication of their material In particular we wish thank Prof A Brini Strasbourg Dr D de Wolff Rouendaal Leiden Prof P *Principles and Practice of Ophthalmology* Daniel M. Stereoscopic acuity in ocular pursuit of moving objects Matthias Sachsenweger,Ulrich Sachsenweger,2012-12-06 There has been growing acceptance of the insight that the methods so far used in the testing of visual functions have been inadequate when it comes to specific problems and should therefore be supplemented with more specialised methods for dynamic testing As long as two decades ago large scale mass screening produced evidence to the effect that visual acuity so far exclusively determined by means of still samples was not identical with visual acuity in the ocular pursuit of moving targets dynamic visual acuity In other words vision testing can at present provide little information on an individual's capability of identification appreciation and judgement of mobile objects Spatial three dimensional perception of moving targets hereafter referred to as dynamic stereoacuity is the particular subject on which findings are reported in this article Findings of that kind are of considerable relevance to everyday life since many of the phenomena that have to be three dimensionally perceived in private life and in occupational practice are in movement So far dynamic stereoacuity has never been systematically studied and is still a blank space on the maps of ophthalmology and physiology This is equally true for dynamic stereoscopy in binocular vision as well as for perception on the basis of movement parallax a phenomenon of differentiated contour displacement within a given field of vision which is also available to the monocular individual under conditions of head or body or object movement within the visual space

Simultaneous Horizontal and Cyclovertical Strabismus Surgery M.H. Gobin,J.J.M Bierlaagh,1994-01-31 Thirty years ago our attention was drawn to the alphabetical incomitances in strabismus As an elevation in adduction is the most frequent incomitance we decided to start treating these incomitances A weakening procedure of the inferior oblique muscle seemed indicated However since we wanted to prevent a torsional overcorrection with a head tilt we displaced the scleral insertion of the oblique muscle towards the equator of the globe This way the torsional action of the muscles is saved A weakening of the horizontal rectus muscles was systematically added making it a simultaneous horizontal and cyclovertical surgery Our way to deal with strabismus developed into a coherent entity and the interest of colleagues encouraged us to write it down We decided to

publish a textbook with a theoretical and an extensive practical part Our approach is based on thirty years of exclusive strabological work half time academic and half time private practice More than 6500 results were analysed and the majority have been published The concerned publications are referred to at the end of the first chapter Private practice allowed to benefit from the fact that patients were operated on by the same surgeon and remained in personal contact during follow up

The Top Books of the Year Oncology Of The Eye And Adnexa Atlas Of Clinical Pathology The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
