Journal of the American Medical Association ,1924 Includes proceedings of the association papers read at the annual sessions and lists of current medical literature **Once Too Many Times** Oliver E Cadam,2015-07-31 As Old Flo sat there watching and listening she became easily convinced of several important observations The first was that her daughter in law seemed uncharacteristically distracted even remote from the events around her Secondly she understood with complete clarity that her own son was infatuated with the pretty little thing sitting opposite She could see the longing in his eyes and

trace it through every behavioural tick on show She felt sure that the others including the girl herself must surely have registered such transparency and she wondered what fireworks lay ahead Another intriguing factor was the big blonde lad who sat there apparently comfortable and confident and yet in some way preoccupied Something there required further investigation Flo just couldn't see why the man's attractive wife would ever find anything worth straying for in her own son's rather tawdry realm Time would tell but she knew her son wanted that girl Spanning a generation this mystery thriller moves between the City of London and Cape Town rural Kent and the hills of Girona in north eastern Spain weaving a tale of lust and deception romance and retribution *The Complete Agent Zero Spy Thriller Bundle (Books 1-12)* Jack Mars, 2021-12-22 You will not sleep until you are finished with AGENT ZERO The author did a superb job creating a set of characters who are fully developed and very much enjoyable The description of the action scenes transport us into a reality that is almost like sitting in a movie theater with surround sound and 3D it would make an incredible Hollywood movie I can hardly wait for the sequel Roberto Mattos Books and Movie Reviews In this much anticipated debut of an epic spy thriller series by 1 bestseller Jack Mars readers are taken on an action thriller across Europe as presumed CIA operative Kent Steele hunted by terrorists by the CIA and by his own identity must solve the mystery of who is after him of the terrorists pending target and of the beautiful woman he keeps seeing in his mind Kent Steele 38 a brilliant professor of European History at Columbia University lives a quiet life in a New York suburb with his two teenage daughters All that changes when late one night he gets a knock on his door and is abducted by three terrorists and finds himself flown across the ocean to be interrogated in a basement in Paris They are convinced that Kent is the most lethal spy the CIA has ever known He is convinced they have the wrong man Do they With a conspiracy around him adversaries as smart as he is and an assassin on his tail the wild game of cat and mouse leads Kent on a perilous road one that may lead back to Langley and to a shocking discovery of his own identity AGENT ZERO is an espionage thriller that will keep you turning pages late into the night One of the best thrillers I have read this year Books and Movie Reviews re Any Means Necessary Also available is Jack Mars 1 bestselling LUKE STONE THRILLER series 7 books which begins with Any Means Necessary Book 1 a free download with over 800 five star reviews

Agent-Based Modeling and Network Dynamics Akira Namatame, Shu-Heng Chen, 2016-01-28 While the significance of networks in various human behavior and activities has a history as long as human's existence network awareness is a recent scientific phenomenon The neologism network science is just one or two decades old Nevertheless with this limited time network thinking has substantially reshaped the recent development in economics and almost all solutions to real world problems involve the network element This book integrates agent based modeling and network science It is divided into three parts namely foundations primary dynamics on and of social networks and applications The authors begin with the network origin of agent based models known as cellular automata and introduce a number of classic models such as Schelling's segregation model and Axelrod's spatial game The essence of the foundation part is the network based agent based models in which agents follow network based decision rules Under the influence of the substantial progress in network science in late 1990s these models have been extended from using lattices into using small world networks scale free networks etc The text also shows that the modern network science mainly driven by game theorists and sociophysicists has inspired agent based social scientists to develop alternative formation algorithms known as agent based social networks It reviews a number of pioneering and representative models in this family Upon the given foundation the second part reviews three primary forms of network dynamics such as diffusions cascades and influences These primary dynamics are further extended and enriched by practical networks in goods and service markets labor markets and international trade At the end the book considers two challenging issues using agent based models of networks network risks and economic growth
