**Flock and Flow** Grant David McCracken, 2006-08-16 Is it possible any longer to read markets fast enough to respond to them? A world of discrete parts is now one interconnected web of ceaseless calculation and response. Marketing has become a thing of speed and turbulence with all the players moving simultaneously. For marketing guru Grant McCracken, the key to success in this dynamic new marketplace is to find a way to slow the world down. And McCracken believes he has the solution. It begins with understanding the mechanics at work today. He says Complexity has a theory. Commotion has a pattern. Dynamism has a system. We can continue to live by damage control or we can change the way we play the game. To survive our own world of collision and speed, marketers need to see the world as flocks and flows. In this exciting new book, McCracken deploys complex adaptive theory to track the movement of trends and new groupings of consumers. He shows how to monitor new trends, whether and when to introduce new brands and brand extensions, how to speak to niche markets and how to avoid

Jocz, 2007-12-28 Marketing has a greater purpose and marketers a higher calling than simply selling more widgets according to John Quelch and Katherine Jocz In *Greater Good* the authors contend that marketing performs an essential societal function and does so democratically They maintain that people would benefit if the realms of politics and marketing were informed by one another's best principles and practices Quelch and Jocz lay out the six fundamental characteristics that marketing and democracy share 1 exchange of value such as goods services and promises 2 consumption of goods and services 3 choice in all decisions 4 free flow of information 5 active engagement of a majority of individuals and 6 inclusion of as many people as possible Without these six traits both marketing and democracy would fail and with them society Drawing on current and historical examples from economies around the world this landmark work illuminates marketing's critical role in the development growth and governance of societies It reveals how good marketing practices improve the political process and in turn the practice of democracy itself
