Philosophy In And Out Of Europe 1987:

Europe's Encounter with Islam Luca Mavelli, 2013-03-01 In the last few years the Muslim presence in Europe has been increasingly perceived as problematic Events such as the French ban on headscarves in public schools the publication of the so called Danish cartoons and the speech of Pope Benedict XVI at the University of Regensburg have hit the front pages of newspapers the world over and prompted a number of scholarly debates on Muslims capacity to comply with the seemingly neutral and pluralistic rules of European secularity Luca Mavelli argues that this perspective has prevented an in depth reflection on the limits of Europe s secular tradition and its role in Europe s conflictual encounter with Islam Through an original reading of Michel Foucault s spiritual notion of knowledge and an engagement with key thinkers from Thomas Aquinas to Jurg n Habermas Mavelli articulates a contending genealogy of European secularity While not denying the latter s achievements in terms of pluralism and autonomy he suggests that Europe s secular tradition has also contributed to forms of isolation which translate into Europe s incapacity to perceive its encounter with Islam as an opportunity rather than a threat Drawing on this theoretical perspective Mavelli offers a contending account of some of the most important recent controversies surrounding Islam in Europe and investigates the postsecular as a normative model to engage with the tensions at the heart of European secularity Finally he advances the possibility of a Europe willing to reconsider its established secular narratives which may identify in the encounter with Islam an opportunity to flourish and cultivate its democratic qualities and postnational commitments This work will be of great interest to students and scholars of religion and international relations social and political theory and Islam in Europe *The Je-Ne-Sais-Quoi in Early Modern Europe*

Richard Scholar, 2005-09-29 What is the je ne sais quoi How if at all can it be put into words In addressing these questions Richard Scholar offers the first full length study of the je ne sais quoi and its fortunes in early modern Europe He describes the rise and fall of the expression as a noun and as a topic of debate examines its cluster of meanings and uncovers the scattered traces of its pre history The je ne sais quoi is often assumed to belong purely to the realm of the literary but in the early modern period it serves to articulate problems of knowledge in natural philosophy the passions and culture and for that reason it is approached here from an interdisciplinary perspective Placing major figures of the period such as Montaigne Shakespeare Descartes Corneille and Pascal alongside some of their lesser known contemporaries Scholar argues that the je ne sais quoi serves above all to capture first person encounters with a certain something that is as difficult to explain as its effects are intense When early modern writers use the expression in this way he suggests they give literary form to an experience that twenty first century readers may recognize as something like their own *Deleuze and Race* Arun Saldanha, 2012-12-01 The first collection of essays on the Deleuzian study of race An international and multidisciplinary team of scholars inaugurates this field with this wide ranging and evocative array of case studies *American Book Publishing Record* ,1988 *Bibliography of the History of Medicine* , European Self-Reflection Between Politics and Religion L.

Bruun,K. Lammers,G. Sørensen,2013-05-07 This collection of essays suggests new ways of looking at the intertwining of political and religious agonies in the period 1914 1991 The long European civil war revealed that Europe far from being formed by a one track progression has followed several tracks or fault lines leading to a number of contrasts in European self perception *World Literature Decentered* Ian Almond,2021-07-13 What would world literature look like if we stopped referring to the West Starting with the provocative premise that the West is ten percent of the planet World Literature Decentered is the first book to decenter Eurocentric discourses of global literature and global history not just by deconstructing or historicizing them but by actively providing an alternative Looking at a series of themes across three literatures Mexico Turkey and Bengal the book examines hotels melancholy orientalism femicide and the ghost story in a series of literary traditions outside the West The non West the book argues is no fringe group or token minority in need of attention on the contrary it constitutes the overwhelming majority of this world **Modern European Criticism and Theory** Julian Wolfreys,2006-04-21 Modern European Criticism and Theory offers the reader a comprehensive critical overview of the widespread and profound contest of ideas within European theory The book focuses primarily on the thought of major voices in poetics philosophy linguistics and psychoanalysis as well as in literary and cultural studies from the Enlightenment to the present day Examining how conceptions of subjectivity identity and gender have been questioned the more than 50 essays written by acknowledged experts in their fields critically assess the ways in which we think see and act in the world as well as the ways in which we represent such thought psychologically politically and culturally A further reading list accompanies each chapter The Oxford Companion to Christian Thought Adrian Hastings,Alistair Mason,Hugh S. Pyper,2000-12-21 Embracing the viewpoints of Catholic Protestant or Orthodox thinkers of conservatives liberals radicals and agnostics Christianity today is anything but monolithic or univocal In The Oxford Companion to Christian Thought general editor Adrian Hastings has tried to capture a sense of the great diversity of opinion that swirls about under the heading of Christian thought Indeed the 260 contributors who hail from twenty countries represent as wide a range of perspectives as possible Here is a comprehensive and authoritative though not dogmatic overview of the full spectrum of Christian thinking Within its 600 alphabetically arranged entries readers will find lengthy survey articles on the history of Christian thought on national and regional traditions and on various denominations from Anglican to Unitarian There is ample coverage of Eastern thought as well examining the Christian tradition in China Japan India and Africa The contributors examine major theological topics such as resurrection the Eucharist and grace as well as controversial issues such as homosexuality and abortion In addition short entries illuminate symbols such as water and wine and there are many profiles of leading theologians of non Christians who have deeply influenced Christian thinking including Aristotle and Plato and of literary figures such as Dante Milton and Tolstoy Most articles end with a list of suggested readings and the book features a large number of cross references The Oxford Companion to Christian Thought is an indispensable guide to one of the central

strands of Western culture An essential volume for all Christians it is a thoughtful gift for the holidays *Millenarianism and Messianism in Early Modern European Culture* J.E. Force,R.H. Popkin,2013-04-17 Thanks to the work of legions of scholars the millenarian expectations within large segments of the population in Cromwellian England have been carefully examined The widespread belief that England with its messianic leader 1 Cromwell heralded the millennium is well known Less well examined perhaps has been the cultural conceptions of the role of millenarian and messianic ideas in the long eighteenth century Especially during the stable Hanoverian era until the American and French Revolutions the common place millennial expectations of the English Civil War appeared to recede By the end of the eighteenth century with the Napoleonic wars millenarian views and interpretations underwent a minor renaissance but with nothing like the fervor it is commonly thought of the Puritan era when so many believed that the end was near By the end of the eighteenth century so the official story goes the religious sceptics and deists of Enlightened England such as David Hume had done too well their work of tarring such religious radicalism with the brush of enthusiasm Happily this official interpretation of the events of the early modern period in which scholars have too often taken their cue from writers such as Hume and simply ignored millenarian contexts and expectations in the Age of Reason has undergone a marked shift in the past twenty years Millenarianism and Messianism in Early Modern European Culture Matt Goldish,R.H. Popkin,J.E. Force,2001-07-31 The influence of millenarian thinking upon Cromwell s England is well known The cultural and intellectual conceptions of the role of millenarian ideas in the long 18th century when so the official story goes the religious sceptics and deists of Enlightened England effectively tarred such religious radicalism as enthusiasm has been less well examined This volume endeavors to revise this official story and to trace the influence of millenarian ideas in the science politics and everyday life of England and America in the 17th and 18th centuries **The Voices and Rooms of European Bioethics** Richard Huxtable,Ruud ter Meulen,2015-04-24 This book reflects on the many contributions made in and to European bioethics to date in various locations and from various disciplinary perspectives In so doing the book advances understanding of the academic and social status of European bioethics as it is being supported and practiced by various disciplines such as philosophy law medicine and the social sciences applied to a wide range of areas The European focus offers a valuable counter balance to an often prominent US understanding of bioethics The volume is split into four parts The first contains reflection on bioethics in the past present and future and also considers how comparison between countries and disciplines can enrich bioethical discourse The second looks at bioethics in particular locations and contexts including policy boardrooms and courtrooms studios and virtual rooms and society while the third part explores the translation of theories and concepts of bioethics into the clinical setting Chapter 10 of this book are freely available as downloadable Open Access PDFs under a Creative Commons Attribution Non Commercial No Derivatives 3 0 license https://s3.us-west-2.amazonaws.com/tandfbis-rt/files/docs/Open+Access+Chapters+9780415737197_oachapter10.pdf **Agricultural Ethics in East Asian Perspective** Paul B. Reconceptualising European Equality Law Johanna Croon-Gestefeld,2017-02-23 This important new book seeks to widen the understanding of the principle of equality within European law Firstly it deconstructs the European Court of Justice s adjudication of cases in the field It then explores how the Member States courts decide on the question of equality This detailed rigorous research allows the author to argue for a reconceptualised equality doctrine Such an adaptation the author argues will provide judges practitioners and academics with the tools to balance institutional considerations against substantive interpretation Theoretically ambitious while grounded in practical application this is a significant restatement of one of the key principles of European law the equality doctrine *Socialism After Communism* Christopher Pierson,1995 Christopher Pierson assesses the evidence of terminal decline but finds rather a whole series of deep seated challenges to traditional forms of socialist and social democratic thinking Above all these problems are to be found in the political economy of social democracy and its commitment to incremental change in the context of an increasingly globalized market economy

The latter chapters of the book are devoted to an assessment of market socialism one of the most vigorous and innovative attempts to seek to recast socialist aspirations under these quite changed circumstances In essence market socialism represents an attempt to reconcile new forms of social ownership with the seeming ubiquity of the market Having outlined this position Pierson carefully and systematically critiques it and in the process develops a set of distinctive arguments about the nature of social ownership the potential of the labor managed economy and the appropriate forms for an extension of economic democracy
