Practice of History Elizabeth Edwards proposes a new approach to historical thinking which explores these questions and redefines the practices at the heart of this discipline Structured around key concepts in historical methodology which are recognisable to all undergraduates the book shows that from the mid 19th century onward photographs have influenced historical enquiry Exposure to these mass distributed cultural artefacts is enough to change our historical frameworks even when research is textually based Conceptualised as a series of sensibilities rather than a methodology as such it is intended as a companion to how to approaches to visual research and visual sources Photographs and the Practice of History not only builds on existing literature by leading scholars it also offers a highly original approach to historiographical thinking that gives readers a foundation on which to build their own historical practices **The photographic news** ,1866 **Artistic**

in a time in which photographs have become extraordinarily mobile They can be exchanged and circulated at the swipe of a finger across a screen The digital photographic image appears and disappears with a mere gesture of the hand Yet this book argues that this mobility of the image was merely accelerated by digital media and telecommunications Photographs from the moment of their invention set images loose by making them portable reproducible projectable reduced in size and multiplied The fact that we do not associate analogue photography with such mobility has much to do with the limitations of existing histories and theories of photography which have tended to view photographic mobility as either an incidental characteristic or a fault Photography The Unfettered Image traces the emergence of these ways of understanding photography but also presents a differently nuanced and materialist history in which photography is understood as part of a larger development of media technologies It is situated in much broader cultural contexts caught up in the European colonial ambition to grasp the world and in the development of a new artificial second nature dependent on the large scale processing of animal and mineral materials Focussing primarily on Victorian and 1920s 30s practices and theories it demonstrates how photography
