Mcdowell,2020-10-07 Does geography affect our sense of self How are social characteristics mapped out on the ground And is there any authentic sense of place now or are we increasingly placeless Concentrating on the period between the end of the Second World War and the end of the century this Reader argues that there is a reciprocal relationship between the constitution of places and people What it means to be a man or a woman to have a nationality and a sense of place has been transformed and reinvented as our view of the world has changed The present is perceived as a time of fear a period in which all that is solid seems to melt into air while the 1950s are a site of nostalgia a period of clarity and certainty a time when people know their place Bringing together an interdisciplinary collection of articles for social and cultural geographers this Reader critically examines the argument that the close associations of the 1950s between place the home the community and the nation state and the social divisions gender class and nationality are breaking down in the 1990s Drawing out the oppositional movements in each decade it seeks to show how the supposed stability of one and the mobility of the other are exaggerated **Place** Tim Cresswell,2014-12-03 Thoroughly revised and updated this text introduces students of human

Studies: Boundaries : subjects, assessment, and evaluation David Scott,2003 Mapping the Cold War Timothy

Barney,2015-04-13 In this fascinating history of Cold War cartography Timothy Barney considers maps as central to the articulation of ideological tensions between American national interests and international aspirations Barney argues that the borders scales projections and other conventions of maps prescribed and constrained the means by which foreign policy elites popular audiences and social activists navigated conflicts between North and South East and West Maps also influenced how identities were formed in a world both shrunk by advancing technologies and marked by expanding and shifting geopolitical alliances and fissures Pointing to the necessity of how politics and values were spatialized in recent U S

history Barney argues that Cold War era maps themselves had rhetorical lives that began with their conception and production and played out in their circulation within foreign policy circles and popular media Reflecting on the ramifications of spatial power during the period Mapping the Cold War ultimately demonstrates that even in the twenty first century American visions of the world and the maps that account for them are inescapably rooted in the anxieties of that earlier era

Mapping the Present Stuart Elden, 2002-01-01 In a late interview Foucault suggested that Heidegger was for him the essential philosopher Taking this claim seriously Mapping the Present assesses the relationship between these two thinkers particularly on the issue of space and history It suggests that space and history need to be rethought and combined as a spatial history rather than as a history of space In other words space should become not merely an object of analysis but a tool of analysis The first half of the book concentrates on Heidegger from the early occlusion of space through the politically charged readings of Nietzsche and Holderlin to the later work on art technology and the polis which accord equal status to issues of spatiality Foucault s work is then rethought in the light of the analysis of Heidegger and the project of a spatial history established through re readings of his works on madness and discipline

People and Place Lewis Holloway, Phil Hubbard, 2014-01-14 An innovative introduction to Human Geography exploring different ways of studying the

relationships between people and place and putting people at the centre of human geography The book covers behavioural humanistic and cultural traditions showing how these can lead to a nuanced understanding of how we relate to our surroundings on a day to day basis The authors also explore how human geography is currently influenced by postmodern ideas stressing difference and diversity While taking the importance of these different approaches seriously as ways of thinking about the role of place in peoples everyday lives the book also tries to encapsulate what has been so vibrant and exciting about human geography over the last couple of decades By using examples to which students can relate such as how they imagine and represent their home the way they avoid certain spaces how they move through retail spaces where they choose to go to university how they use the Internet how they represent other nations and so on the authors show how geography shapes everyday life in a manner that is seemingly mundane yet profoundly important
