**Psychology Perspective** Yang Frank Gong, Chun Lai, Jinghe Han, Chan Lu, Sihui Echo Ke, 2024-02-21  
Over the past two decades Chinese as a foreign or second language CFL/CSL has been increasingly taught and learnt as an important language both within and outside China. Studies in the field have attempted to address deep seated tensions between existing educational ideologies, concepts, strategies and approaches and student learning process and performance and between existent teaching methods and techniques and the globalization of Chinese language education      Language as Discourse

Michael McCarthy, Ronald Carter, 2014-07-22  
In this book Michael McCarthy and Ronald Carter describe the discursive properties of language and demonstrate what insights this approach can offer to the student and teacher of language. The authors examine the relationship between complete texts both spoken and written and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discursive environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language. In so doing the authors argue the need for language teachers, syllabus planners and curriculum organisers to give greater attention to language as discourse      *Managing Evaluation and Innovation in Language Teaching* Pauline Rea Dickins, Kevin Germaine, 2014-06-11

The editors seek to draw attention to the possibilities of inter disciplinary exchange to inform the reader of current practice and highlight emerging issues in the expanding field of evaluation in language teaching especially in ELT. students test taking skills text type and text length Given the critical role that reading plays in literacy development and learning this research is hoped to assist researchers and teacher practitioners in understanding what reading skills are how they have been conceptualised and how they can be tested It is also hoped that this book will be a reference for researchers who are interested in using the Many facets Rasch Model and the FACETS software to investigate the hierarchical ordering of reading skills or any other language skills     Analyzing Genre V.
