Reading The Naked Truth:

Meeting the Sensei Maya Mortimer, 2021-11-01 The early twentieth century Shirakaba White Birch movement's later involvement with prewar Japanese nationalism has hitherto caused especially Western scholars to neglect its major significance Shirakaba was created by graduates of the aristocratic Gakushuin Peers School in reaction against the dominant naturalism of contemporary Japanese literature Though at first seeking ideological and cultural models in Europe Shirakaba writers soon developed an increasing sense of their own Japaneseness The first part of this volume chronicles the birth of this literary movement and of its important magazine under the charismatic leadership of Mushanokoji Saneatsu In the second part the author illuminates the ethos of the movement by analysing the figure of the Sensei Master in key Shirakaba texts by Mushanokoji Saneatsu Nagayo Yoshio and Kurata Hyakuzo This volume definitely breaks new ground by seeing the movement as one of the significant episodes in the cultural history of Japan

Critical Social Issues in American Education H. Svi Shapiro, 2004-09-22 This text reader brings together powerful readings that critically situate issues of education in the context of the major cultural moral political economic ecological and spiritual crises that confront us as a nation and a global

community It provides a focus and a conceptual framework for thinking about education in light of these issues Readers are exposed to the thinking of some of the best and most insightful social and educational commentators Critical Social Issues in American Education Democracy and Meaning in a Globalizing World Third Edition is intended to work on two levels First it helps readers to develop an awareness of how education is connected to the wider social structures of cultural political and economic life Second it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives of what a transformed society and educational process might look like The editors goal is to deliberately engage readers in connecting the work of teachers to an ethically committed politically charged pedagogy The assumption on which they base the text is that educators must see their work as inextricably linked to the broader conflicts stresses and crises of the social world it is not otherwise possible to make sense of what is happening educationally What happens in school or as part of the educational experience reflects expresses and mediates profound questions about the direction and nature of the society we inhabit The text is organized thematically into five sections which address respectively social justice and democracy consumerism culture and public education marginality and difference moral and spiritual perspectives on education and globalization and education Each section is preceded by a brief essay that introduces the readings This Third Edition includes many new readings and addresses issues that have more recently emerged as especially significant such as concerns about the implications of globalization and the post 9 11 world commercialism violence and the ever increasing influence of high stakes testing This compelling text is relevant for a wide range of courses in educational foundations educational policy curriculum studies and multicultural education that address the social context of education cultural and political change and public policy
