READINGS NOTES

Chapter 3: Demand, Supply, and Market Equilibrium pg. 42-55

Firms and Households: The Basic Decision-Making Units

What gets produced? How is it produced? Who gets what is produced?

- Markets are the institutions through which exchange typically takes place.
- Firms are organizations that transform resources (inputs) into products (outputs). They are the primary producing units in a market economy.
 - They work to produce goods and/or services, but not always for a profit.
 - Usually work to maximize profit and minimize losses.
- An entrepreneur is a person who organizes, manages, and assumes the risks of a firm, taking a new idea or a new product and turning it into a successful business.
- Households are the consuming units in an economy.
 - Very diverse in wide market places like the US.
 - Limited to their income source over what they can consume from firms.

Input Markets and Output Markets: The Circular Flow

- Product or output markets are the markets in which goods and services are exchanged.
- Input or factor markets are the markets in which resources used to produce goods and services are exchanged.
 - The labor market is the input/factor market in which households supply work for wages to firms that demand labor.
 - The capital market is the input/factor market in which households supply their savings, for interest or for claims to future profits, to firms that demand funds to buy capital goods.
 - The land market is the input/factor market in which households supply land or other real property in exchange for rent.
- The inputs into the production process are the factors of production. Land, labor, and capital are the three key factors of production.

Input and output markets are connected through the behaviors of both firms and households. Firms determine the quantities and character of outputs produced and the types and quantities of inputs demanded. Households determine the types and quantities of products demanded and the inputs of the quantities and types of inputs supplied.

Readings In Macroeconomics:

Readings in Macroeconomics, 1974 *Readings in Macroeconomics* M. G. Mueller, 1971 Selected Readings in Macroeconomics and Capital Theory from Econometrica David Cass, Lionel W. McKenzie, 2003-02-01 A great many of the most important developments in modern economics were first revealed in the pages of *Econometrica* This selection of readings from that journal is the third in a series and contains its editors choice of the best articles in the general area of macroeconomics and capital theory that appeared in issues dating from 1935 to 1966 A broad range of topics is covered in the 27 articles selected in order to indicate the general extent of the field A few of the articles were microeconomic in their original intent but have a clear influence on later macroeconomic theory **Readings in Macroeconomics** John H. Hand, 1974 **Macroeconomic Themes** M. J. C. Surrey, 1977 **Selected Readings in macroeconomics and capital theory from 'Econometrica'**, 1974 Essential Readings in Economics Saul Estrin, Alan Marin, 1995-05-24 Intellectual advances in economics often come from debates that have been long forgotten but which offer context depth and clarity to contemporary study *Essential Readings in Economics* makes available in a single volume some of the seminal papers in the areas of microeconomics and macroeconomics for intermediate courses in economic principles The readings are organised in two groups Microeconomics and Macroeconomics Part 1 looks at topics ranging from The Theory of Demand and The Firm and Supply to The Economics of Uncertainty and Information In Part 2 the wide ranging debates over the last 55 years are illustrated with contributions from Keynes Friedman Phillips and other leading Economists This vigorous and accessible collection of readings is intended to supplement and extend the understanding students could obtain from conventional introductory textbooks *Macroeconomic Themes* M. J. C. Surrey, 1976 **Essential Readings in Economics** Saul Estrin, Alan Marin, 1995 Seminal papers by leading economists in areas of microeconomics and macroeconomics **Pluralist Readings in Economics: Key Concepts and Policy Tools for the 21st Century** Maria Alejandra Madi, 2017-06-15 The era of globalization has brought about unprecedented social political and environmental challenges for policy makers around the world due to the global impact of economic decisions In view of these challenges economics as a discipline needs to be taught with the goal of broadening the dialogue on social responsibility and developing a new pluralist culture of decision making which is inclusive to different schools of economic thought *Pluralist Readings in Economics Key concepts and policy tools for the 21st century* highlights the long standing debates regarding economic systems business models criteria of justice and economic policies by providing conceptual openings to economic theory in an engaging and accessible way The author provides broad coverage of relevant topics through the selection of influential economic thinkers and introduces the reader to their ideas context and relevant interpretations While dealing with complex problems the author goes beyond commonly known concepts by presenting questions on the historical context of globalization The study of economic concepts in this way leads to asking new questions concerning various issues relevant to economics The goal of the text is to provide

an interdisciplinary perspective to readers in order to equip them with information that is key to address global economic challenges. Thus this pluralist approach calls for a reflection of the evolution of global social and economic conditions to demonstrate problem solving approaches that align with the goal of addressing these challenges. Pluralist Readings in Economics: Key concepts and policy tools for the 21st century is suitable to a broad interdisciplinary readership as it will benefit all those who seek to better understand the complex stakes of the capitalist system in the tensions between regulatory policies, free market equilibria and participatory openings in governance. This introductory work also prepares the reader for debates and discussion in economic theory aimed at shaping policy transformations towards a more equitable, just and sustainable world.

Readings in Macroeconomics, 1984 **Macroeconomics and New Macroeconomics** Bernhard Felderer, Stefan Homburg, 1992-08-21. This book gives a comprehensive account of traditional and more recent developments in macroeconomic theory. It is written primarily for students at the intermediate level. The book differs from the customary expositions in that the authors do not discuss topic by topic but orthodoxy by orthodoxy. Thus the main approaches like Classical theory, Keynesian theory, theory of portfolio selection, Monetarism, Rational Expectations theory and Neokeynesian disequilibrium theory are presented in historical order. Each of these approaches is substantiated and criticized in a self-contained chapter and the authors have taken great pains to bring out the relations and differences between them. A mathematical appendix reviews those mathematical facts which are especially important for macroeconomic models and serves to make the text easy to read.

Readings in Microeconomics William Breit, Harold M. Hochman, 1971 **Classic Readings in Economics** David C. Colander, Harry Landreth, 1995 Readings in macroeconomics, ed. by M. G. Mueller, 1971 Readings in Macroeconomics KENDALL HUNT PUB CO, Yu Peng Lin, 2009-06-19 **Macroeconomic Theory** Harold R. Williams, John D. Hufnagle, 1969 *Economics as a Social Science* Frank J. B. Stilwell, George Argyrous, 2003. A comprehensive collection of classical and contemporary readings in this field from leading local and international scholars. The release of this new edition provides up to date analysis of economic theory grounded in case studies that are applicable to our current social and political climate.

Macroeconomic Systems Krish Bhaskar, David F. Murray, 2015-09-25. This volume originally published in 1976 creates a basis from which the specialist topics of macroeconomics can be approached. The first section deals exclusively with a simple classical and Keynesian model within a single common framework to facilitate easy comparison. Although simple models they provide a sound starting point for the more advanced ideas which make up the second part of the book. Recognizing that one of the crucial purposes of macroeconomics is to provide advice for central government policy makers, the policy implications of the models are discussed.
