Are We Ready for College-Ready? Deborah McGriff, 2012 Through the years educators parents and the general public believed that a college degree is one of the most powerful strategies for our nation's war on poverty The increased earning power of individuals with college degrees and the contribution to our economic security were frequently acknowledged Our commitment and attention to college readiness persistence and success intensified after President Obama announced in his 2011 State of the Union Address the goal of moving America from 12th place globally back to number one in the proportion of young people with a college degree The urgency to return to number one by 2020 was coupled with the prediction that by 2018 nearly two thirds of all jobs will require a college education Just as no single key factor can guarantee college readiness no single cut score alone can define college readiness Nonetheless the 2012 ACT results and the College Board State Capital Campaign suggest that we are far from achieving President Obama's goal of being number one in the proportion of young people with a college degree by 2020 The Americans have identified key success factors but they have not demonstrated the political will to scale these key factors fast enough to transform the lives of the most underserved and to return to a global leadership position

Ready, Willing, and Able Mandy Savitz-Romer, Suzanne Bouffard, 2012-04-01 How can an understanding of adolescent

development inform strategies and practices for supporting first generation college goers In Ready Willing and Able Mandy Savitz Romer and Suzanne Bouffard focus on the developmental tasks and competencies that young people need to develop in order to plan for and succeed in higher education These include identity development articulating aspirations and expectations forming and maintaining strong peer and adult relationships motivation and goal setting and self regulatory skills such as planning The authors challenge the predominant approach of giving young people information and leaving it to them to figure out how to apply it They show how well intended college access efforts can miss the mark for instance by focusing on students who already see themselves as college material rather than working to help all students develop a college going identity In addition most college access programs and practices focus almost exclusively on providing academic preparation and financial support In Ready Willing and Able Savitz Romer and Bouffard call for a new approach one that emphasizes the key developmental tasks and processes of adolescence and integrates them into existing college access practices in meaningful ways Rather than treating young people as passive recipients of services they argue adults can engage them as active agents in the construction of their own futures

Ready for College Conor Bentley, 2008

Getting Ready for College Dr. Mable Scott, 2013-10-24 This book is great for a middle school student or a high school freshman to start preparing for a higher education It is very easy reading and very entertaining with true stories from college students who wish they could go back into time to change their attitudes and practices when they were in high school or even back in middle school The book is an appeal to all students who read it to meet all school expectations in preparation for college even if you are undecided right now Read what others had to say about not being fully prepared for college After all the college students whom you will hear from did not plan to struggle or fail in college they failed to plan ahead when they were in middle and high school This book encourages and gives students the opportunity to set and work towards goals as early as the middle school years Students can use the book as a reference for some things to do and to think about even if one is not thinking about getting a formal higher education but will follow some other career path Parents are going to love having their child to read this book because this book can serve as a point of conversation with parents and high school student This is a forever book Five ten or fifteen years from high school graduation compare what you wrote in the goals section of the book with whatever actually became of you Keep in mind that parents and teachers know that children are going to make mistakes as they grow up but students can avoid not being prepared academically socially and recreationally if they plan ahead
