A Global Perspective on Real Estate Cycles Stephen J. Brown, Crocker H. Liu, 2012-12-06 In March 1999 New York University Salomon Center in association with the Department of Finance at NYU Stern held a one day conference on the impact of real estate cycles on the real estate industry both from a domestic as well as an international perspective The conference featured the leading research on this topic in the United States Europe and Asia Currently the real estate industry is at a critical point New development projects around the world are being put on hold given recent developments in the international capital markets The industry is hard hit by the decline in real estate investment trust REIT share prices and a shrinking pool of capital for real estate ventures This has unfortunately coincided with serious financial problems of very

large hedge funds and other institutional investors in the market for commercial mortgage backed securities There is need for new insights into the implications of U S and global real estate cycles on real estate securities including REITs and mortgage backed securities as well as direct real estate investment This global orientation is important given the high mobility of capital into the real estate the increasing integration of real estate markets and the proposed expansion of real estate investment trusts REIT into international real estate The process of globalization has resulted in increased competition between cities for the attraction of investment

The New Suburbanites Robert W. Lake,2017-07-28 National data indicates a surge in African American suburbanization during the 1970s What are the barriers that have slowed this process for so long Is black entry to the suburbs synonymous with integration To what extent does it contribute to convergence in the residential distributions of whites and blacks This careful and thorough study marshals evidence that black suburbanization offers less than full realization of the American Dream Homeownership in the United States is a source of security a sign of status a means of equity accumulation and a bond to the community The basic premise underlying *The New Suburbanites* is the preeminence of equal access Survey data collected for this analysis pertains to successful homebuyers whites and blacks who were able to negotiate safely the treacherous housing market conditions Specifically Robert W Lake draws from a unique survey of black and white homebuyers to assess the institutional and housing market barriers to black suburban homeownership How does racial discrimination add to the cost time and difficulty of housing search for black homebuyers What is the effect of discrimination on housing prices resale value and equity accumulation What is behind the complexity of white and black attitudes to suburban racial integration What is the perspective of the real estate agent the key market intermediary The book addresses each of these questions and concludes with a critique of present federal fair housing legislation and an assessment of policy implications

The Identity of German and Japanese Civil Law in Comparative Perspectives /

Die Identität des deutschen und des japanischen Zivilrechts in vergleichender Betrachtung Zentaro Kitagawa, Karl Riesenhuber, 2011-12-22 Developments of the law in Japan and in Germany provide ample reason for an inquiry into The Identity of Japanese and German Civil Law Japanese civil law has a long tradition of absorbing and digesting foreign influences in particular from Germany France England and the United States The absorption of foreign influences occurred on various levels at the legislative level in particular during the drafting process of the Civil Code at the judicial level and in the field of scholarship The reception of legal theories was followed by a unique process that has been characterised as theory reception Kitagawa Irrespective of such foreign influences we can discern a unique legal tradition in Japan in other words its own identity At the same time German private law is under the influence of legal harmonisation in the EU While the predominant view in the 1980 s was still that this development was confined to a restricted area that of consumer law recent developments demonstrate that European Union legislation now influences large parts of German civil law What does this mean in terms of the identity of German civil law And how does this development of a Europeanization of German civil law affect related legal systems such as that of Japan The present volume contains the proceedings of a conference held in Japan in 2006 to mark the occasion of the Germany Year in Japan In their contributions Japanese scholars discuss the various influences on Japanese law German scholars enquire into the Europeanization of German private law and finally the identity of Japanese civil law is discussed from the perspectives of German civil law and of common law **High-Performance**

the Role of Legal Origin on the Performance of Property Stocks Within the Context of a Tactical Asset Allocation Strategy Christopher Shun, 2005-07-06 The role of legal origin was first introduced in the Law and Finance Literature by La Porta et al 1997 in an original study of legal determinants of external finance Their study is timely given that investor protection is crucial because in many countries expropriation of minority shareholders and creditors by controlling shareholders or corporate insiders is extensive This dissertation intends to replicate the original La Porta et al 1997 study for Property stocks in 23 countries whose legal jurisdictions falls into the four of the legal fraternities established by La Porta namely English French German and Scandinavian The primary motivations for this thesis is that the Property stocks broadly captures several critical aspects of the original La Porta study Specifically Property stocks are very tangible assets that can easily be collateralised due to the direct property underpinning the net asset backing of Property stocks The end result of this research endeavour is to provide a framework for institutional portfolio investors to determine the appropriate countries

whose real estate markets have the most favourable investor climate to facilitate a more attractive environment for institutional investors given the Means Variance Optimisation MVO methodology A tactical asset allocation strategy will be employed to determine the three stages that a global investor should undertake to arrive at the optimum proportions of funds to invest in Common stocks or Real Estate stocks in any country firstly based on an Emerging Developed country analysis then secondly a geographic Regional analysis and finally on Legal Origin analysis to distil the appropriate proportions of funds that should be invested This Dissertation has three original contributions which are as follows 1 An Empirical investigation of role of Legal origin on the performance of Real Estate stocks within the context of a tactical asset allocation strategy This dissertation studies the impact that Developed versus Emerging Regional markets and Legal Origin jurisdictions have on the results of the optimal MVO portfolios based on the highest Sharpe ratio and presents the research findings of this study at the Primary Secondary and Tertiary levels This dissertation is envisaged to fill the research gap between legal origin and the performance of Property stocks across four legal fraternities in 23 countries and make an original contribution in the Law Finance and Portfolio Management Literature 2 ACTIVE Ex Ante versus PASSIVE na ve portfolio management strategy The original contribution is the application of this methodology to property stocks specifically within a Legal Origin and Regional market framework Data is collated from 1984 to 2003 20 years inclusive from 23 countries with specific reference to the Common and Real Estate stocks markets therein A 5 year rolling Ex Post analysis is computed to determine the optimum allocation weights in a multi asset portfolio and subsequently an Ex Ante analysis next immediate year of the portfolio weights applied to an Actively managed portfolio This portfolio will be compared with actual portfolio performance from 1989 to 2002 fifteen subsequent years to determine whether the Ex ANTE methodology which underpinned the Active management strategy is preferred over a Passive equal investment in each asset class strategy for real estate stocks portfolio management The Ex Ante analysis will be undertaken at two stages Firstly Legal Origin markets and Secondly Regional markets 3 A replication of the Gordon et al 1995 study which determined the appropriate percentage based on the Markowitz Portfolio Theory MPT that should be invested in the Real Estate stock markets in 14 countries The original contribution is the application of Gordon s methodology to the Legal Origin markets proposed by La Porta et al 1997 This research study encompasses 23 c

International Real Estate W. Seabrooke, P. Kent, Hebe Hwee-Hong How, 2008-04-15 Real estate activity across national boundaries investment development and asset management is firmly established as a major component of global economic activity International Real Estate provides the understanding of real estate strategies and transactions that cross national boundaries International organizations lament the narrow perspective of professionals in the real estate field which stems from training that takes a parochial rather than international view of the practices and processes of real estate markets This book takes an explicitly international perspective to the decision making process leading to final accept or reject investment decisions It will be the first to adopt an institutional approach that

directly addresses the problems of how to identify and avoid the main pitfalls of cross border investment in real estate The key to understanding international real estate comes from understanding the impact on investment and management decisions of differences in the formal and informal rules of the game The authors define the key feature of international real estate as the institutions that frame facilitate or impede investment in land and buildings across national boundaries

Law and Policy for China's Market Socialism John Garrick, 2012-05-04 This edited volume presents fresh empirical research on the emerging outcomes of China's law reforms The chapters examine China's going out policy by addressing the ways in which the underpinning legal reforms enable China to pursue its core interests and broad international responsibilities as a rising power The contributors consider China's civil and commercial law reforms against the economic backdrop of an outflow of Chinese capital into strategic assets outside her own borders This movement of capital has become an intriguing phenomenon for both ongoing economic reform and its largely unheralded underpinning law reforms The contributors ask probing questions about doing business with China and highlight the astonishing escalation of China's outbound foreign direct investment OFDI Law and Policy for China's Market Socialism includes contributions from leading China law scholars and specialist practitioners from the People's Republic of China Hong Kong the United States the United Kingdom and other countries who all extend the examination of powerful influences on China's law reforms into new areas Given the forecast for the growth of China's domestic market those wishing to gain a better understanding and seeking success in the world's most dynamic marketplace will benefit greatly from reading this book This book is essential reading for anyone interested in Chinese economics and business Chinese Law Chinese politics and commercial law

Real Estate Finance in the New Economy Piyush Tiwari, Michael White, 2014-04-07 The financial deregulation of the last quarter century has meant large flows of funds around the world seeking the highest risk adjusted return for investors Real estate is now established as an important asset class and advances in information technology provide the necessary tools to complement global developments in real estate finance and investment A variety of investment vehicles have emerged and Real Estate Finance in the New Economy examines these along with financing and risk in the context of globalization deregulation and an increasingly integrated international world economy by exploring questions like How have real estate financial structures evolved as economies grow and become internationalised What role do economic change and financial systems play in the development of real estate investment Are the risks associated with the new economy really new What is the future direction for real estate financing The authors develop an economic framework for discussions on individual financial products to examine how real estate financial structures change with economic growth and internationalisation and also to show how developments in real estate finance impact economic growth
