as a way to pay their bills and keep track of their finances Their individual check registers become a tool rather than a lesson In Real Life Math skills are used and then repeatedly reinforced due to the natural pattern of repetition that is found in life For example bills are not paid during a 1 week lesson on paying bills Rather bills are paid repeatedly throughout the program because paying bills is a repetitive event in life This constant recurrence that is natural in daily life serves as a perfect learn review review review review pattern in the classroom As students learn to function in the make believe town of Willow U S A they truly learn to function in life Most students can benefit from this method of learning consumer math however for students who struggle in school this approach might be the only way they will really learn needed math skills Students who have not previously had success in math can succeed with this program because it offers an opportunity to learn by doing Many people learn best by doing and for some students hands on participation is the only way they learn well For this reason teaching math through a simulation that models real life is a logical idea Real Life Math Living on a Paycheck offers a realistic life experience method of teaching financial literacy as students learn a wide range of financial skills within the context of simulation This format allows students to learn all the skills in relation to each other rather than in isolation Using this approach is logical because financial skills are rarely used in isolation in real life Hands-On Math Projects with Real-Life Applications, Grades 3-5 Judith A.
